ONE DAY. ONE GOAL.

ONE BIG THANK YOU!

On Tuesday, March 15, Spartans near and far came together to make a better tomorrow.

MSU's sixth #GiveGreenDay campaign raised more than \$1.4 million to support students and community initiatives, thanks to more than 7,359 gifts from donors around the world.

MSU's 24-hour day of giving might be over, but your opportunity to give doesn't have to be!

Spartans Serve

“The spirit of service lives strongly in Spartans’ hearts. I salute all those who engage in making a positive difference.

Another successful academic year is behind us, including the graduation of more than 9,200 undergraduate and graduate degree-earners. They move on to the next chapter in their lives equipped with the skills and the determination to be contributors and leaders in their communities and beyond.

This commitment to service is part of what makes us Spartans, a legacy that is acknowledged in our MSU 2030 strategic plan. It is a recurring theme in recognitions given to our outstanding students, faculty and staff. It is reflected in our ranking by U.S. News & World Report—No. 2 among public universities—for service-learning. And in this issue, we meet a number of Spartans who represent our engaged and giving spirit.

Service to our communities, such as that pursued for more than a century by MSU Extension, is a deliberate expression of the university’s mission statement to advance outreach, engagement and economic development activities that are innovative, research-driven and lead to a better quality of life.

The amount of service-oriented education, research and outreach at MSU is truly impressive, as are the people who do it. Those who attended our Winter University sessions in Florida earlier this year heard several undergraduate students speak about their experiences. One of them, Mariam Sayed, delivered the

April Board of Trustees meeting research presentation focusing on her work aimed at enhancing non-speaking autistic individuals’ ability to communicate.

Service expectations today are built into many of our colleges’ programs, and opportunities for service across the university are facilitated through the MSU Center for Community Engaged Learning (CCEL), which has been preparing students for lifelong civic and social responsibility for over 50 years. Even in the pandemic-influenced 2020–2021 academic year, the CCEL reported more than 20,200 student community-engaged learning registrations.

It was my pleasure again this spring to congratulate MSU’s 10 Community Engagement Scholars Program (CESP) participants, who are connected to community organizations by the CCEL. The CESP is a supervised service-learning program sponsored in part by my office. This year, students were placed in organizations in Lansing and Detroit, and I’m proud of their good work.

As you will read in the following pages, the spirit of service lives strongly in Spartans’ hearts. I salute all those who engage in making a positive difference.

Go Green!

WORTH LOOKING UP TO

At my elementary school, there was a group called Service Squad. These were the older kids, fifth- and sixth-graders in orange sashes and safety vests, who would keep lunch lines in order, sort the recycling or help kids find their bus after the bell. I looked up to these students. They were doing things that needed to be

done and they were doing them for the good of us all.

Now that we're "grown-ups," the folks doing good aren't always so easy to identify. But they're still doing what needs to be done. This issue explores the role of service in the Spartan experience. We'll meet six alumni who are affecting the world in different ways, find inspiration in the Great Lakes, get a feel for MSU Extension's outreach and top it off with a trip to the Dairy Store.

In my grade school days, I thought you only looked up to people who are senior to you. Now, I know age has nothing to do with it. If it's in your nature to extend a hand and keep looking at challenges from new angles, I'm looking up to you.

There are a lot of Spartans who fit the bill.

MSU RESEARCH

Thank you for sharing important articles like Screening for Dementia with AI in the Spartan Magazine. I love hearing about collaborations between universities that are focused on solving important research topics.

While I grew up in East Lansing and attended MSU in the '60s, I now live in Oregon. Since reading the fall 2021 issue and learning about the collaborative work on Dementia with Oregon Health & Science University, I have reached out to OHSU to be part of the study. Thank you MSU.

NURSING PRIDE

I was so happy to see the picture of my MSU Nursing Class in the recent edition of Spartan. Our class was the first to graduate from Michigan State University in 1955, the year that the name was changed.

I have so many happy memories of my classmates and the experiences we had together. Those of us who are still living, correspond by email.

I am so proud of the growth of the nursing program and to see the students and programs making a difference in health care.

Fields of Dreams

IM facilities are to receive major upgrades

When IM Sports West was built in 1959, it was the crème de la crème of university intramural buildings. Today, with an ever-growing body of active-minded enthusiasts on campus, Spartans need more space.

(Read more, page 8)

IM Facilities to Receive Upgrades

Take a closer look at the planned state-of-the-art fitness center and new turf field complex.

CHERRY LANE FIELDS RECREATION CENTER

The new recreation center will replace IM West once completed and will be located on Shaw Lane, between Birch and Harrison roads. IM West will be open throughout construction to serve the Spartan community. Planning is underway and feasibility studies are being conducted to meet student, faculty, staff and alumni needs. The center is projected to open in fall of 2025.

SERVICE ROAD TURF COMPLEX

This project will include two new artificial turf fields and a support services building, slated for completion for fall semester 2022. The new turf fields will support a variety of Intramural and Club sports, including lacrosse, soccer, flag football, ultimate Frisbee, softball and baseball. The new support services building will include restrooms, first aid and training, ample storage space and staff spaces.

MSU ROTC FINISHES SECOND, MOVES ON TO NATIONAL COMPETITION

MSU's ROTC program represented true Spartan spirit at the seventh ROTC Brigade Ranger Challenge in Fort Knox, Kentucky, where they placed second out of 38 teams. The 10 competing students went through months of rigorous training to prepare for the competition. Their hard work paid off. The cadets went on to compete at the national Sandhurst Competition at the U.S. Military Academy in April 2022.

Dagbovie is New Dean of the Graduate School

MSU Provost and Executive Vice President for Academic Affairs Teresa K. Woodruff, Ph.D., has selected Pero G. Dagbovie as the associate provost for graduate and postdoctoral studies and dean of the Graduate School.

A University Distinguished Professor in the Department of History, Dagbovie began his career as an assistant professor in the Department of Interdisciplinary Studies in the College of Lifelong Learning at Wayne State University in Detroit from 2000 to 2003.

He joined the MSU Department of History, teaching a range of courses in U.S. history, the philosophy of history, African American history and African Studies. He was a Lilly Teaching Fellow (2005-2006) and a core faculty member of the African American and African Studies Ph.D. pro-

gram. From 2010 to 2015, Dagbovie served as the graduate director and associate chair in the Department of History.

"I am excited by the vision and leadership aptitude that Dr. Dagbovie brings with him as he steps into this new role," said Woodruff. "He possesses the skills and experience needed to advance the mission of the Graduate School and to support our graduate, professional and postdoctoral communities here at MSU."

MSU SCHOOL OF PACKAGING WAS AWARDED ONE OF ONLY SEVEN GRANTS BY THE U.S. DEPARTMENT OF ENERGY TO REDUCE PLASTIC WASTE AND EMISSIONS.

RECYCLING THE UNRECYCLABLE

The plastics problem, like an onion, has layers. With a \$1.7 million grant from the U.S. Department of Energy, Michigan State University's Muhammad Rabnawaz is starting to peel away some of those problematic layers to make plastics more recyclable.

"If you go into a grocery store, you will find multilayer packaging everywhere. It's ubiquitous," said Rabnawaz, an assistant professor in MSU's top-ranked School of Packaging. Multilayer packaging consumes nearly a third of plastics used by manufac-

turers and most of it can't be recycled

Rabnawaz and his team are simplifying multilayer packaging to promote sustainability while preserving performance. The team is also collaborating with researchers from Pacific Northwest National Laboratory and Amcor, a leading company in responsible packaging.

GETTY IMAGES

THE ART OF HEALTH

MSU's College of Human Medicine recently partnered with the Flint Institute of Arts to develop observational skills in health care professionals.

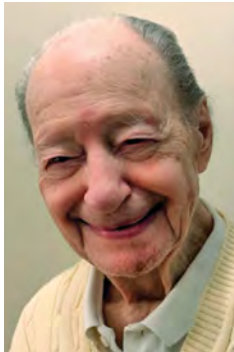

Neej Patel, a third-year medical student at the College of Human Medicine's Flint campus, developed a workshop that combines the understanding of artwork with a better understanding of humans. By examining specific art pieces, the workshop helps health care professionals hone their observational skills and take those enhanced techniques into the medical field.

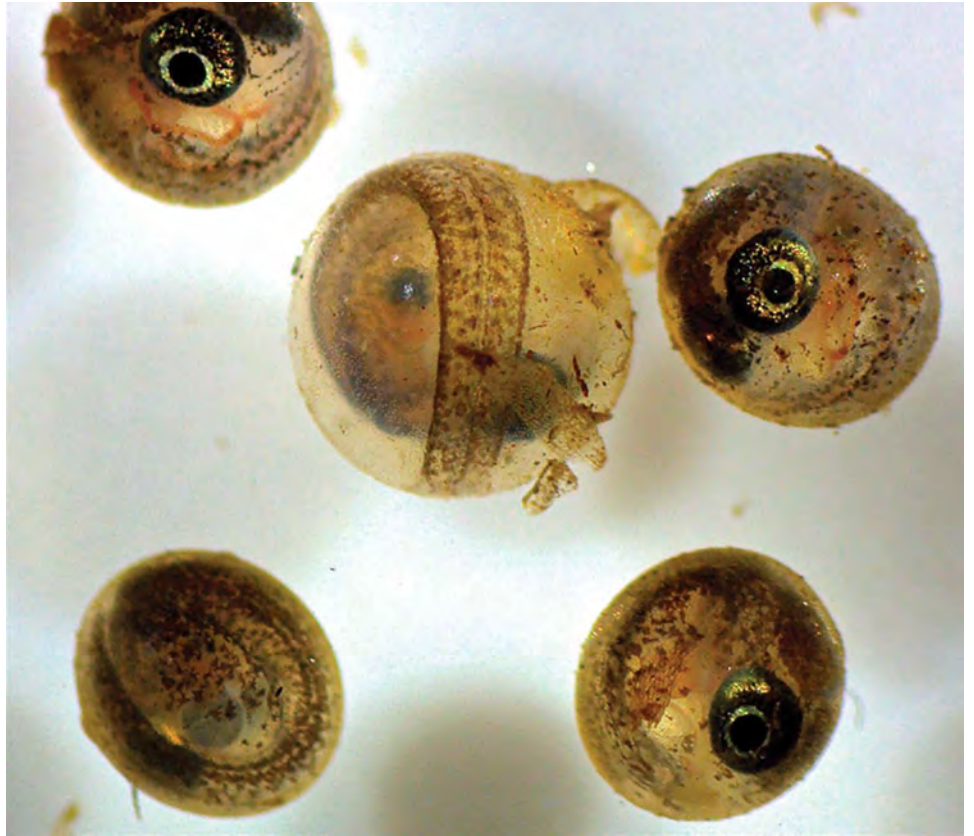

Don't Be Such A Stiff

Researchers and clinicians in the Michigan State University College of Osteopathic Medicine have determined osteopathic manipulative treatment is an effective method to reduce pain and disability in patients with chronic neck pain. Jacek Cholewicki, a professor in spinal biomechanics in the Department of Osteopathic Manipulative Medicine, calls chronic pain “a huge health care problem that affects millions of people.” The team also found the treatment improved patients’ sleep quality, fatigue and depression—conditions that “seem to go hand in hand with chronic pain,” he noted.

AMERICAN GIANT OF BROADCASTING— FRANK BOYLE

Frank Boyle, a 1950 journalism graduate, received the Library of American Broadcasting Foundation's prestigious Giants of Broadcasting and Electronic Arts award last October. He was honored alongside Hall of Fame sports broadcaster Bob Costas, Good Morning America co-anchor Robin Roberts, Emmy and Golden Globes nominated actress and Happy Days alum Marion Ross and others. "I've been very fortunate," he said of the recognition. "The award for being a giant of radio was stunning."

Big Lessons from Little Fish

Spartan researchers have published the complete genome of the Rio pearlfish, a 'superhero' species that can inform studies of human health and even suspended animation.

Don't underestimate the diminutive, doe-eyed Rio pearlfish, for looks can be deceiving. This fish has evolved over the eons into one tough little customer, producing eggs that can survive being completely dry for months at a time.

That's one of the reasons MSU scientists have sequenced the first complete genome of the fish. With that genome, researchers can better understand the biology and evolution of the species' survival skills.

This new information strengthens the Rio pearlfish's potential as a model organism that can further understanding of human health. "If we can understand how they control their growth and development," said Andrew Thompson, lead author of the Spartan team's report, "maybe we can understand it better in humans, too. There is a lot of potential to inform studies of human health."

A Bright Future for MSU

The Board of Trustees is proud to be of service to this great university. Indeed, while my fellow trustees and I hold a diversity of viewpoints, we are united in our desire to give back and ensure the door of opportunity remains open to all Spartans.

Despite the challenges of these past two years under COVID-19, the Board is pleased to report that the future of our university is very bright. Through our strategic plan, MSU 2030, we are empowering excellence, advancing equity and expanding our impact.

As called for in our strategic plan, Spartans are leading the future of innovation. Our Grand Rapids Innovation Park is a hub for biomedical research, bioengineering and health technology, and has the potential to lead to transformational health discoveries.

Great education programs also need great facilities. In April, we were pleased to celebrate the groundbreaking for the School of Packaging's building expansion. This project, with a new endowed professorship, will help the school maintain its global leadership in packaging education.

In May, we also celebrated one of the most remarkable projects in MSU's history: the opening of the Facility for Rare Isotope Beams. As the preeminent user facility of its kind in the world, FRIB will open the doors to discovery, answering big questions about the universe; contributing to practical applications in homeland security, medicine and more; and inspiring the next generation of scientists.

Our strategic plan also calls on us to lead the way in sustainable health, improving the health of Michigan's residents and reducing disparities through innovative clinical care and public health initiatives. To that end, our partnership with Henry Ford Health is advancing a new standard of health care. And with McLaren Health Care, we supported a project that includes a 240-bed hospital, a multi-specialty outpatient care center and a Karmanos Cancer Institute in partnership with MSU Health Care.

As we advance these many projects, the university continues to be a good steward of its resources. In March, MSU successfully issued \$500 million in century bonds. Offered only to select and highly rated institutions, the century bond will help support the university's major projects and initiatives.

The Board of Trustees is proud to support the many exciting efforts happening on our campus and beyond. They are all important to our institution, providing essential resources for our students and advancing faculty and staff success. We look forward to continuing to work alongside our community to strengthen this great university and build an even brighter future for all Spartans.

Go Green!

Dianne Byrum, Chair
MSU Board of Trustees

“I am a passionate advocate for philanthropy and the transformative impact it can make on an institution’s ability to effect positive change in the world.

KIM TOBIN JOINS MSU AS VICE PRESIDENT FOR UNIVERSITY ADVANCEMENT

With more than two decades of experience in philanthropy and development, Kim Tobin has been tapped to serve as Michigan State University’s next vice president of University Advancement.

Tobin started her new role May 1, succeeding Marti K.S. Heil, who retired after an accomplished 45-year career spanning three institutions—more than 33 of which were at MSU.

“Kim has an impeccable track record of success in donor and alumni relations with an inherent ability to engage audiences in philan-

thropic opportunities that transform lives,” said MSU President Samuel L. Stanley Jr., M.D. “Her involvement in development at every level of an institution will serve her well in this role, and I know she will further the excellence of MSU.”

As vice president of University Advancement, Tobin will lead a 300-plus person team through planning and executing the institution’s next comprehensive capital campaign—a campaign that will further solidify

MSU's position as a leading global research university that improves the lives of students, and positions our state, nation and world for a brighter future. Tobin will oversee the entire University Advancement operation, including all development efforts and the MSU Alumni Office.

"I am a passionate advocate for philanthropy and the transformative impact it can make on an institution's ability to effect positive change in the world," Tobin said. "I'm eager to add my energy to the team at MSU and work together to help the university advance its newly defined strategic priorities. As a Great Lakes native, coming to Michigan feels a bit like coming home."

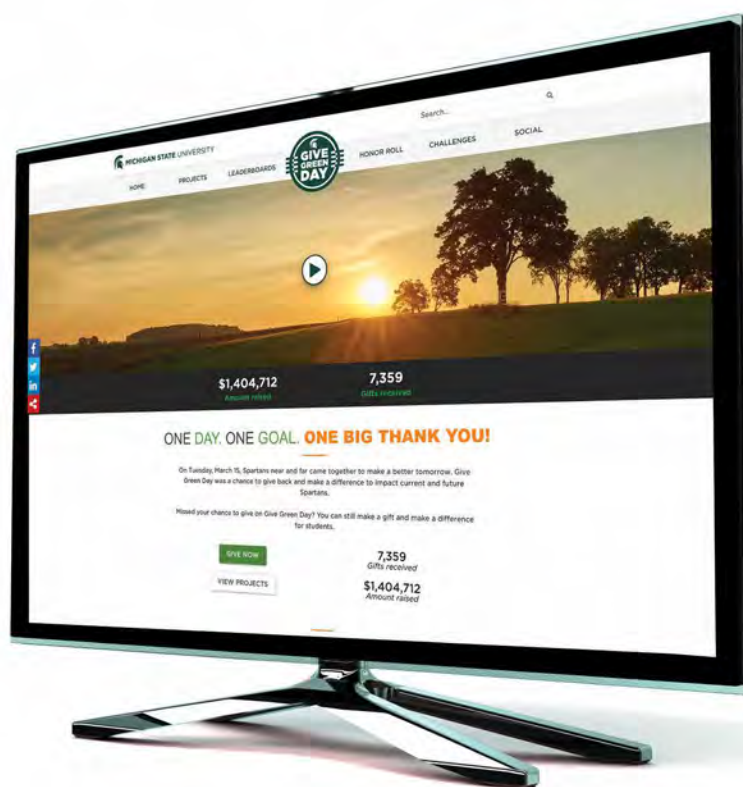

Tobin comes to the MSU community after serving as vice president for University Advancement at Colorado State University, where she oversaw a 160-member team and led development efforts, campaign initiatives, and alumni and donor relations. Her tenure at CSU was extensive, including experience at every level of the institution and leading two successful comprehensive campaigns. The most recent \$1 billion campaign concluded in 2020 having exceeded its goal 651 days early with the support of more than 140,000 donors.

A FUN FACT

Originally from Thunder Bay, Ontario, on the northern shore of Lake Superior, Tobin said the first college football game she ever attended was in Spartan Stadium.

Thanks to You, Give Green Day Raises More Than \$1.4 Million in a Single Day

MSU raised \$1,404,712 on its sixth Give Green Day, a 24-hour fundraising campaign on Tuesday, March 15. Loyal partner MSU Federal Credit Union stepped up as a sponsor once again, providing matching funds for giving challenges throughout the day. The campaign netted 7,359 gifts from donors in 19 countries around the world. These gifts benefit students, faculty, programs and experiential learning across the university.

SOPHIA FRANKLIN

HIGH-FLYING SOPHIA FRANKLIN BREAKS INDOOR POLE-VAULTING RECORD... AGAIN

Okemos native Sophia Franklin feels right at home breaking records that she set. Having set the school records for outdoor and indoor pole-vault with vaults of 4.37 meters and 4.18 meters in 2019, Franklin demolished both in 2022 with an indoor vault of 4.38 meters at the Meyo Invitational in January.

"I don't really like to brag about that kind of stuff," Franklin said. "It's definitely something I'm very proud of, but I don't think I've ever been super flashy about it. That's just who I am. I'm very proud of everything that I've accomplished and very grateful."

Next up for Franklin: she hopes to take her talents all the way to the Olympic trials in a few years.

Franklin's Accomplishments So Far:

- MSU outdoor pole-vault record—4.37m
- MSU indoor pole-vault record—4.38m
- 2019 Big Ten indoor champion title
- 2021 Big Ten outdoor champion title
- 2022 All-Big Ten First Team
- 2022 Second Team All-American

LEAH JOHNSON NAMED HEAD VOLLEYBALL COACH

"Michigan State has the potential to be in the national conversation on an annual basis. I am eager to get to work helping the team achieve greatness on and off the court." —Leah Johnson. Joining the Spartans from Illinois State where she spent five years at the helm, Johnson brings NCAA tournament and conference championship experience to East Lansing.

4

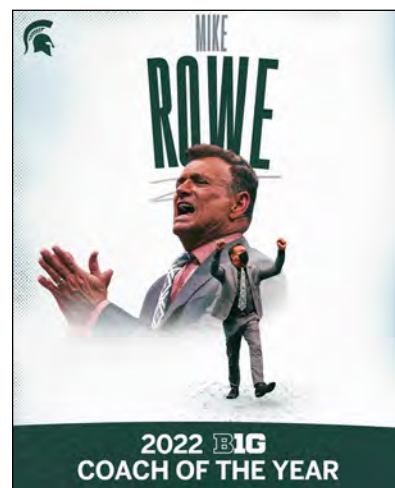

Number of MSU track and field athletes who qualified for the 2022 NCAA Indoor Championships:
Morgan Beadlescomb, Jenna Magness, Sophia Franklin and Trevor Stephenson

Judges Flip for Schulte and Rowe

To wrap up a successful season, first-year gymnast Skyla Schulte was named All-American, just the third Spartan gymnast ever to be included on the list, and the first in program history on beam. Schulte also received the Big Ten Freshman of the Year award and was a five-time Big Ten Freshman of the Week. She has earned career-highs of 9.950 on bars, beam and floor, with a personal-best 9.900 scored on vault.

“Skyla has successfully acclimated to collegiate gymnastics, our changing culture and her role within our program and continues to crave more,” says head coach Mike Rowe, ’85. “All of this has played a significant part in her success and we are so proud.”

Speaking of Rowe, the coach took home his own accolades, earning Big Ten Coach of the Year. “It’s hard to put into words,” Rowe says of the honor. “We just have the ultimate coaching package with coaches Nicole [Jones] and Whitney [Snowden] and Alina [Cartwright], and I wouldn’t have it any other way. It just feels like the cherry on top of a great Big Ten season.”

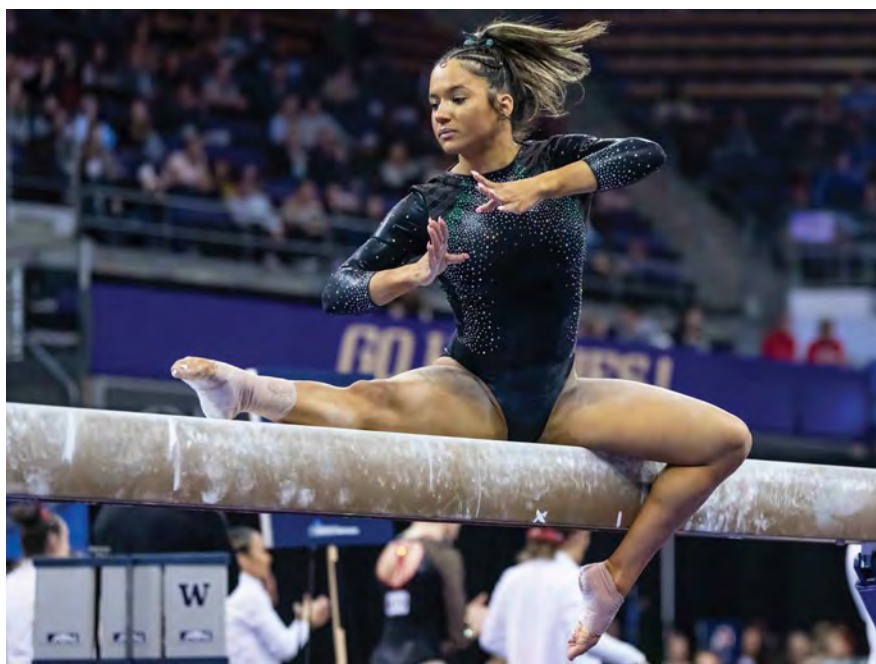

“Hungry for More Every Day”

Head coach Mike Rowe speaks to the tenacity of MSU Gymnastics. This season, they finished third in the Big Ten, second overall at the Big Ten Championships and ended the season ranked No. 9 nationally, the highest in program history. The Spartans also qualified for the NCAA Regional Championships as a team for the first time since 2016, where they finished third and posted MSU’s highest all-time team score.

JAZZ CHAMPS

On April 20, the MSU College of Music Jazz Studies program took first place at the second annual Jack Rudin Jazz Championship.

The event, held at Jazz at Lincoln Center in New York City, gathered 10 of the nation's most well-regarded university jazz programs to compete in a two-day invitational.

As the first place winner, the College of Music will receive an award of \$10,000 to build on the excellence of its jazz education programs.

150K

Estimated total attendance over Summer Circle Theatre's past five decades of productions.

Summer Circle Theatre Is Back For 2022

After going dark for two years during the pandemic, the outdoor productions return to campus.

Since presenting its first play in 1961, MSU's Summer Circle Theatre has been a staple of summertime in East Lansing.

Although presentation locations have bounced around campus over the years to accommodate growing crowds, SCT continues to operate under the same basic premise that has guided it from the start: to offer free programming, including a kids camp and live performances, and create a summer destina-

tion for arts, education and entertainment in Mid-Michigan.

After two years dark, SCT returns in 2022 with a blend of old favorites, musicals and provocative new plays. It's a celebration of art and summer that happens in the Summer Circle Courtyard, an amphitheater-style venue between the Auditorium and Kresge buildings.

To Know More Is To Do More

How MSU's Know More Campus Survey was developed and utilized to improve the university's culture around relationship violence and sexual assault.

We know that everyone, not just students, may be impacted by RVSM and we want to hear their experiences,” said Carrie Moylan, an associate professor in the College of Social Science and member of MSU’s Relationship Violence and Sexual Misconduct Expert Advisory Workgroup.

To measure culture, perceptions and policies associated with relationship violence and sexual misconduct on campus, Moylan led the development of a robust survey that sampled not only MSU students, but also faculty and staff.

“The feedback we receive will be important as we evaluate our progress and continue to improve programs and resources,” said Moylan.

So far two iterations of the Know More Campus Survey have been administered. One in spring semester 2019 and another this past spring with plans to continue the confidential survey biennially over the next several years.

Moylan explained that though many campuses and organizations

“ We will get to take an honest look at where we are compared to 2019 and have the tough conversations.

have administered climate surveys, there weren’t many comparable to the data the workgroup was hoping to gather. The workgroup contracted RTI International—an independent, nonprofit research organization—to help.

“RTI had an established survey instrument that was proven for students, and we worked with them to figure out how we could include faculty and staff,” said Moylan. “They are also able to weight the data for the best accuracy in the numbers.”

Though the survey brought about increased transparency, Moylan noted there were challenges.

“In the first round of Know More, it was really important to get people to trust the survey. All the work we

have done has made this round much easier,” said Moylan.

The results of the 2019 survey informed the content of MSU’s RVSM Strategic Plan, released in the spring of 2020, including improvements to the school’s RVSM and Title IX Policy, as well as the sanction and discipline process for faculty. The survey results have also helped improve resources and campus services like the new Sexual Assault Healthcare Center, and helped the university understand overall needs to create a culture that supports survivors, which is the basis of the new Support More campaign.

Moylan is looking forward to the data that will be released from the second iteration in fall of 2022.

“We get to compare what we changed and what we need to change moving forward,” she said. “We will get to take an honest look at where we are compared to 2019 and have the tough conversations.”

Note by Note

When Randy Scott, '92, was a young saxophone player, he found a mentor who would change his life. Today, Randy Scott is that mentor. BY VIC SAMPER

When Randy Scott had the chance to choose a musical instrument in fourth grade, his choice was a foregone conclusion. After all, he had long ago been “Grover-ized.”

The son of two music-loving parents, Scott’s childhood home in Baltimore was rarely quiet. But, while other homes were filled with chart-topping hits, Scott’s mother favored the music of saxophonist and jazz pioneer Grover Washington Jr. In the years that followed, Scott pursued his passion for sax, spending his afternoons playing along to Washington Jr.’s records, note by note.

Recognizing their son possessed talent and passion belying his age, Scott’s parents rewarded his straight A’s with an opportunity to meet his idol, Grover Washington Jr. This meeting would change the 12-year-old’s life and unlock a lifelong mentorship.

As a teenager, Randy’s status as an emerging talent forced a decision: attend Boston’s prestigious Berklee College of Music or enroll in Michigan State’s Classical Music program.

Once again, the presence of Grover Washington Jr. loomed large, nudging Scott toward East Lansing and the more well-rounded musical education MSU offered. An education that wouldn’t come without its challenges as Scott found himself immersed in a new world, surrounded by gifted musicians, under the exacting and inspiring tutelage of professors like Dean James Forger and Ron Newman. And he thrived.

“My junior year,” Scott recalls, “I did a show on campus featuring the comedian Sinbad. At the time, he was the host of the TV show, “It’s Showtime at the Apollo.” After the show, he said ‘you should really be on Showtime.’”

But first, the cash-strapped college kid had to engineer a way to get to New York City. So, Scott got creative. “In February, I posted flyers that said, ‘send your sweetheart a song for \$5 performed live by me.’ It just so happened there was a snowstorm that weekend and I’m trudging through the snow, carrying my instrument in one hand and a boombox in the other, playing for couples.”

The plan worked. Undeterred by the merciless atmosphere of Har-

lem’s Apollo Theater, Scott went on and won. Then won again. And once more. As a three-time winner of “It’s Showtime at the Apollo,” Scott was quickly offered a record contract with Warner Bros. Although he turned that deal down, he knew he was on the cusp of realizing his dream of becoming a professional musician.

Today, Randy Scott is an internationally celebrated jazz artist with several Billboard #1 hits to his name;

Randy Scott, '92
College of Music

PHOTO COURTESY RANDY SCOTT

a Grammy-nominated producer for his work alongside Vickie Winans; a contemporary of musical luminaries like Kirk Franklin and Fred Hammond; a two-time White House performer; and the recipient of the NAACP Walter Francis White Service Award.

Most importantly to Scott, he's a devoted husband, father and, in a fitting twist of fate, an influential music teacher in Southfield Public Schools, where he impacts the lives of students

from all walks of life with his inspiration and guidance.

"My plan was to stay for one year," Scott says. "One year turned into 24. It became a passion. The connection that I'm able to make with the kids. The mutual respect. And them knowing I genuinely care about them. That's the equivalent of being on stage for me."

Today, Randy Scott is an internationally celebrated jazz artist with several Billboard #1 hits to his name; a Grammy-nominated producer ... and a much-loved music teacher!

The Great Embrace

A pioneer in the field of ballast treatment technology, Allegra Cangelosi, M.S. '87, is helping to keep invasive species out of the Great Lakes. BY ALEX GILLESPIE, '17

“We can’t take the Great Lakes for granted. We have to actively learn how to take care of them or we’ll lose them. We have to embrace the Great Lakes.

Shortly after graduating from MSU with a master’s in resource development, Allegra Cangelosi, ’87, was tasked with addressing an intricate problem threatening the Great Lakes ecosystem—aquatic invasive species. Cangelosi recalls an explosion of the Eurasian ruffe (a member of the perch family) in Duluth-Superior Harbor as the first warning of just how detrimental invasive species could be to the region.

With no natural predators and a faster maturation cycle, the ruffe out-competed native fish species for food and habitat, leaving them reeling. The region was also victim to many additional invasive species, which were being routinely transported to the Great Lakes from overseas in the

ballast water of cargo ships. Cangelosi was drawn to the issue of invaders. “It wasn’t just one state’s problem, one city’s problem,” she says. “It was about a region caring for a shared resource.”

Then working for former Ohio Sen. John Glenn as the director of the bipartisan Senate Great Lakes Task Force, Cangelosi had to figure out how to limit the introduction of critters’ ballast water. For our land-dwelling audience, ballast water is the extra weight added to a ship after it unloads its cargo. That counterweight is what keeps them stable at sea. In commercial vessels, ballast water can reach millions of liters, and when you’re pulling in water from your destination, you’re also sucking up the fauna that lives there. Upon arrival to the Great Lakes, vessels dumped their ballast water—and stowaways—before loading their next shipments. According to the Environmental Protection Agency, that practice introduced 30% of the invasive species to the Great Lakes.

Cangelosi’s team worked to implement legislation that would require ships to exchange ballast before entering the Great Lakes. It wasn’t all smooth-sailing; Cangelosi describes “incredible skepticism within the maritime industry. That if you exchange your ballast water, the ship will start bobbing like a cork, it’ll tip over. It’s not structurally made for that.”

Allegra Cangelosi, '87
College of Agriculture and
Natural Resources

With the threat of closing the St. Lawrence Seaway—the connector between the Atlantic Ocean and the Great Lakes—the commercial shipping industry got creative with a method for exchanging ballast while plying on the high seas. New water came in while old water went out, dumping the freshwater critters into salty seawater where they were less likely to thrive.

Ballast exchange had issues. The method burned more fuel and could only be safely performed when sea conditions were right. This pushed

Cangelosi into researching onboard ballast treatment, a prospect that was also met with skepticism. Cangelosi was particularly interested in filtration as it would minimize additional chemical treatment. In 1997, with help from the Great Lakes Protection Fund, Cangelosi's Great Lakes-based team tested an onboard filtration system on the Canadian Laker MV Algonorth, proving the method was effective. That research was critical in supporting the advent of national and international policies directing ships to treat ballast water.

In 2021, the Great Lakes Protection Fund recognized Cangelosi's work with the Great Lakes Leadership Award. As a senior researcher at Penn State Behrend, she continues to advocate for the region. "We can't take [the Great Lakes] for granted," she says. "We have to actively learn how to take care of them or we'll lose them. We have to embrace the Great Lakes."

Expanding Access for Chronic Disease Management

Mia Jang is using her dual expertise in nutrition and technology to reshape health care access. BY LIAM BOYLAN-PETT

As a graduate student at MSU in the 1990s, Mia Jang threw herself into research around obesity. Growing up in South Korea, her mother was obese, and so were other family members. She had studied food science and human nutrition at Seoul National University, but now at MSU, she found herself eager to develop a medicine that could cure obesity in humans.

She studied Leptin, a protein that was lacking in a genetically obese mouse model, combing through research to see its effects on neurotransmitters—these mechanisms might, Jang hoped, be key to a potential cure. Jang planned to continue this research once she earned her Ph.D.

Then, in 1999, her nephew in South Korea died in an accident. With her family across the globe and feeling helpless, Jang wanted to do something. So, she went online. Jang learned HTML and created a website where her family and

friends could express their grief. Pre-social media, Jang was excited to find a way to connect people across the world.

Around the same time, she had a realization about her research. “With human obesity,” Jang said, “changing

people’s behavior is more important than developing medications.”

She didn’t know it at the time, but the seed had been planted for Health & Wellness Innovations, the company she would create that today is a digital health solution provider helping organizations improve the health and wellness of their populations.

Back in 1999, Jang was already an expert in nutrition, but had also honed her technology skills in creating the grief support website. With no plans of becoming an entrepreneur when she came to MSU, Jang decided to take a leap and create a site that could open access to important nutrition and health information.

In 2001, she launched Nutriinfo.com, which offered a structured online weight and health management program to Korean consumers. Unfortunately-

Mia Jang, M.S. '94, Ph.D. '99
College of Natural Science

ly, it never took off. She returned to MSU in a research capacity in 2004, but remained interested in the idea of providing health care access online. In 2007, Jang recreated Nutriinfo in the U.S. This time, the site was geared toward dietitians, allowing them to automate their work by collecting data from patients to make coaching easier.

The site had legs. By 2014, digital health technology was gaining traction. Jang rebranded as Health & Wellness Innovations and changed the focus from dietitians to public health educators for accessible care.

“My goal,” Jang said, “is to empower health professionals so they can deliver personalized health care to their own populations.”

Health & Wellness Innovations created the platform WATT (Wellness Anytime Through Technology) that is used by both patients seeking guidance, and the health providers available to them.

The pandemic proved the value of technological advances in health care knowledge. “People realized our technology was essential for managing chronic diseases such as obesity and diabetes,” Jang said.

She hopes her platform will continue to grow and reach wider and wider populations. It’s not the world of medicine she expected to find herself in back in the ’90s, but it’s where she feels at home today.

“I didn’t know anything about business when I started mine,” Jang said. “Usually, our competitors raise large sums of money, but we did not have that. But my expertise in the field and the technology is what will hopefully set us apart.”

So far, Jang is on course.

Returning the Favor

With a love for giving back and a curiosity that doesn't quit, Russ King, '70, stays rooted in his desire to help give people a chance. BY RUSS WHITE, '82, '01

“ If it's all about you, then boy, you're not going to have a whole lot of impact on anybody.

Russ King, '70, saw his first college football game at MSU and has been attracted to the campus ever since. “I just absolutely loved the environment and the physical surroundings. I just felt like I was in a paradise—even in the winter, because it can be very beautiful then, too,” he says.

“Michigan State really fit my personality because it focused on people who maybe would never have a chance to go to school. And they personify that by going back to the community. We can apply our knowledge and help people who are living there right now.”

That love for the MSU, and for helping others, led King to donate his time, talent and treasure to help make the university even better. He has been a generous donor to MSU for nearly four decades, and credits his Christian faith for encouraging his dedication to service. King is particularly active among MSU Extension's Detroit Partnership for Food, Learning and Innovation, which centers around urban food research and seeks to develop solutions to economic and nutritional challenges unique to urban environments. Since 2014, King

has generously supported DPFLI's mission to transform how people and communities interact with their local food systems.

He's even advanced his own knowledge in the subject. King is a graduate of MSU Extension's Master Gardener Program, which he enrolled in to further his then-elementary knowledge of plants.

It stems from a love of nature that has followed King his entire life.

“I did a lot of lawn mowing when I was growing up, and I just had a great appreciation for God's creation,” he says. “But I didn't know anything about it.”

King grew up in Ypsilanti, Michigan, and graduated from MSU in 1970 with a business degree. After starting his work life selling copiers, he transitioned into the investment industry where he established a successful career, and went on to open his own firm—White Pine Investment Co.—in 1997.

He says that name was intentional; it was an important part of starting the business. “I wanted to find a name that represented the values and the culture that we were hoping to build. White pine is the Michigan state tree. It's a fast-growing tree.

Russ King, '70
Eli Broad College
of Business

When there's a storm, there might be a branch or two that gets torn off, but that gives it more character. It withstands an awful lot of turmoil, which you must do in this business."

Resilience and generosity, the latter of which has been part of his character for as long as he can remember, are what continue to drive King today.

"When I was growing up, I had a paper route and three or four jobs until I graduated from high school," he says. "I paid for college myself. During that time, I would buy gifts for my siblings. I got a lot more joy out of it than they did. It was just fun to do, and so I sort of got used to that."

It's clear that King's greatest joys come not from what he's done himself, but from discovering what he can do for others.

"If it's all about you," he says, "then boy, you're not going to have a whole lot of impact on anybody."

MILKING IT

Of all the storied traditions that accompany the Spartan experience, this one may be the tastiest.

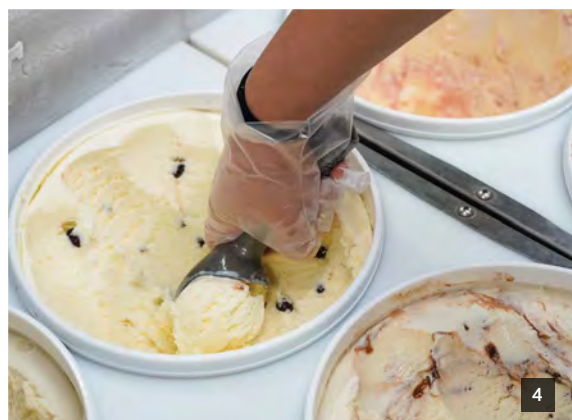

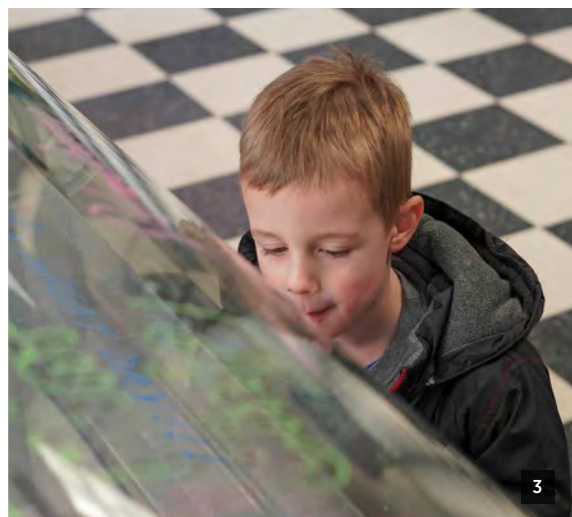

While MSU has been manufacturing dairy since the late 1800s, the Dairy Store as we know it has been serving scoops of Spartan spirit for more than 60 years. Its ice cream flavors are a part of campus culture enjoyed by Spartans young and old.

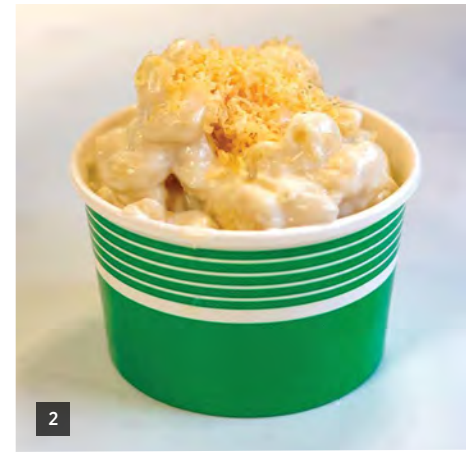

"Everyone's happy when they're eating ice cream," says Dairy Store manager Aaron Weiner, '99. "Even when we have long lines, when our guests reach the counter, they have huge smiles on their faces." And many share their love with the team. "It's so gratifying to hear what the Dairy Store means to my fellow Spartans."

Sales from the Dairy Store support the MSU Dairy Foods Complex, which trains the next generation of dairy producers. The facility also carries out research in food safety, food processing, diet and health on behalf of the Department of Food Science and Human Nutrition. That means every scoop of Dairy Store ice cream makes a difference on campus and off. So, let's dig in.

ABOUT THE PICTURES

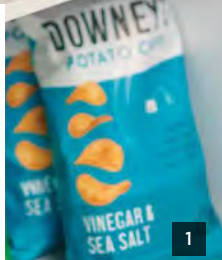

1. The Cream Team: Front and center is Aaron Weiner with employees (left to right) Julianna Thompson, Maggie Dickie, Ivanna Ortega and Noel Tom.
2. 3-year-old Marie Ransom reminds us that there is no height requirement to enjoy a Dairy Store treat.
3. Choosing your flavor is half the fun. Henry Crandall, 5, weighs his options.
- 4-5. Generous servings of decadent flavors, such as What's the Scoop, Stanley? and Izzo's Malted Madness, and handmade waffle cones keep the crowds coming back.

Clockwise from top left:

1. Stacey Newman and her son, Nash, enjoy an afternoon snack.
2. Hungry for more? Try a hot helping of mac & cheese.
3. Keep an eye out—the Dairy Store Ice Cream Cart has been known to show up at all kinds of community events.
4. Monthly milkshake concoctions are sure to satisfy any size sweet tooth.
5. Right next door is the MSU Dairy Plant, a state-of-the-art processing system equipped to churn out a variety of natural cheeses, cultured dairy products and ice cream.

Love the creamy texture of dairy treats? You can thank Spartan professor G. Malcolm Trout's long-heralded 1930s research in homogenization—the process that breaks up fat for a smooth consistency and delicious flavor.

Clockwise from top left:

1. The Dairy Store also stocks a variety of Michigan-made goods in partnership with the MSU Product Center, which supports innovation and growth for entrepreneurs and businesses in food, agriculture and natural resource sectors.
2. Thompson prepares fresh waffle cones.
3. A freezer full of take-home cartons means Dairy Store ice cream is always within reach.
4. Cheese, another Dairy Store specialty, is available in a number of rotating varieties.
5. Waffle cones are a popular choice.

the soul of service

Across the globe, MSU alumni are putting in work to advance the common good. And while empathy, inclusion and giving back don't typically show up on exams, stepping into service roles is part of the Spartan identity.

BY DANIEL P. SMITH

ENDEA OWENS, '15

A musician, a philanthropist
and one of six Spartans
featured in these stories
showing the many ways
Spartans keep giving back
to their communities.

**INTRODUCTION BY QUENTIN TYLER,
DIRECTOR, MSU EXTENSION**

Spartans in Service: It's Who We Are

There's a particular pearl of wisdom from Academy Award-winning actor Denzel Washington that cycles around my mind often: "At the end of the day, it's not about what you have or even what you've accomplished. It's about who you've lifted up, who you've made better. It's about what you give back."

For more than a century, MSU Extension has improved the quality of life in Michigan by bringing the vast knowledge and resources of MSU directly to communities across Michigan. Powered by more than 600 education professionals throughout the state, we have equipped residents with information, tools and resources to perform professional duties, raise healthy families and enhance communities while empowering children to dream of a more dynamic, vibrant future.

Service to others is central to our work, a necessary ingredient to building trust, engaging with residents and creating a more lively, sustainable world.

Whenever I peer beyond the corner of Extension's work, I see equally beautiful and powerful actions. Our students advocating for equity and inclusion initiatives. Spartan alumni sharing their time and knowledge to uplift others. Faculty and advisers guiding students through real-world projects. Whether shaping public policy, amplifying unheard voices or striving for social change, Spartans continually demonstrate resilience, empathy, inclusion and innovation in an increasingly complex and evolving world.

These are not simply moments of service. Rather, this is a green-and-white-clad movement of service ingrained in who we are. Spirited and committed to the greater good, our actions directly fulfill our mission to improve lives for those in Michigan and around the globe. We know there are thousands of Spartans doing good. This article will introduce you to just a few. We take pride in that.

“These are not simply moments of service. Rather, this is a green-and-white-clad movement of service ingrained in who we are. Spirited and committed to the greater good, our actions directly fulfill our mission to improve lives for those in Michigan and around the globe.”

PORTRAITS OF SPARTAN SERVICE:

Spartan Service & Support Stories

The following six alumni illustrate six different avenues of service and support. By lifting up neighbors, connecting communities and driving toward a more sustainable future, they're part of an ambitious group intent on ushering in a more hopeful and positive tomorrow.

IN SERVICE TO NEW YORK CITY NEIGHBORHOODS:

Endea Owens '15

ARTISTS IN SERVICE

Spartan artists around the world are helping to cultivate a more vibrant and colorful future. With their hands and creative energy, MSU alumni are inspiring new perspectives, challenging conventional wisdom, imagining novel realities and facilitating transformative connections.

Endea Owens understands the transformational power of music, the art's ability to inspire, motivate and unify.

As a high school student at the Detroit School of Arts, Owens, a violinist who taught herself to play bass by listening to Mozart and Bach, watched stageside as Rodney Whitaker, MSU's Distinguished Professor of Jazz Bass, dazzled students with a live performance.

"At that moment, I knew a career in music was possible," Owens said.

After earning her degree in Jazz Studies from MSU in 2015, Owens moved to New York City to attend the renowned Juilliard School. Four years later, her career as a musician took off, as Owens toured with Diana Ross and landed a position as the house bassist on "The Late Show with Stephen Colbert." Music, she said, unlocked hidden opportunities and spurred a newfound confidence.

"I've been so blessed," Owens said.

As she watched people lose jobs and loved ones amid the COVID-19 pandemic's earliest days, and saw accelerating social angst following the May 2020 death of George Floyd, Owens thought music, such a positive force in her own life, could similarly uplift others.

In response, Owens launched The Community Cookout, a New York City-based organization striving to build stronger communities through music, meals and activism. At Community Cookout events, Owens pairs up to 200 free meals from local restaurants with

live music from a group of 7-8 musicians she personally pays.

"Let go of the stress for these two hours because we have food and music," she beamed.

Over the past two years, Owens has hosted Community Cookout events in Brooklyn, the Bronx, Queens and Harlem, where people told Owens they hadn't heard jazz on the street in years—a striking revelation given Harlem's fabled place in the genre's history.

"Whenever people hear music outside, they gravitate toward it," she said. "Music brings such a spirit of joy and togetherness."

Community Cookout events, she continued, have injected positivity and joy into some of the city's most distressed communities, delivering hope and grace alongside meals and music.

"It's just like Rodney coming to my high school," Owens said. "You have to show people you care, and that their life is valid."

The Community Cookout continues to grow and generate momentum. Owens has developed partnerships with local churches to expand outreach, and also crossed state lines with an event in Newark, New Jersey.

"I have to keep this going," she said. "If people feel like no one is with them, that there isn't a community, I'll create it for them."

“

*Having a community around you can
change your whole life.*

IN SERVICE TO THE EARTH:

Caroline Yi Cheng '86

ARTISTS IN SERVICE

Spartan artists around the world are helping to cultivate a more vibrant and colorful future. With their hands and creative energy, MSU alumni are inspiring new perspectives, challenging conventional wisdom, imagining novel realities and facilitating transformative connections.

Some talk about turning trash into treasure. Caroline Yi Cheng is really doing it. Yi Design, the upstart, Shanghai-based outfit Cheng co-founded with designer and materials researcher Karl Yin in 2021, is solving the problem of ceramic waste management by creating eco-materials for the interior design and building industries.

The journey started in 2015 when Cheng, a mad scientist type with a self-confessed “weird outlook” on art, peered at a pile of broken ceramic pots in the prominent ceramic production town of Jingdezhen, China. With much of the city’s ceramics waste dumped illegally and no government policy for recycling the material, an estimated one million tons of ceramics waste mounted each year.

“I knew I had to do something with this,” said Cheng, an accomplished artist whose work has appeared at the Museum of Fine Arts in Boston and The British Museum in London.

Powered by Yin’s development of a more sustainable binding material as an alternative to cement, Yi Design invented two products to propel China’s continued environmental transformation and spark a more sustainable world.

The first, YiBrick, is a material that can be used as permeable pavement for sponge cities, a fast-growing urban construction model that leverages green roofs, rain gardens and other innovations to improve flood management and

strengthen ecological infrastructure. Cheng champions YiBrick, which is lighter than traditional cement bricks and greatly reduces carbon emissions rates, as an enhancement to the ecological environment and biodiversity.

Yi Design’s second product, YiTile, is suitable for walls, tabletops and other interior design elements. The hand-crafted tiles feature more than 90 percent recycled ceramic waste and come in 180 different colors.

With a growing global push for sustainable construction and design, Yi Design’s products have attracted the attention of powerhouse brands like Starbucks, which is interested in incorporating YiTile into its store designs, as well as international architecture firms seeking more eco-conscious materials.

“As a ceramic artist and inventor, this is one way I can be a part of the solution,” Cheng said.

A member of her Hong Kong high school’s Conservation Club before joining Green Peace as an MSU undergraduate studying Zoology and Studio Art, Cheng has long maintained an interest in environmental conservation. Yi Design, she said, is her opportunity to leave a legacy and contribute to a more sustainable world.

“As responsible global citizens,” Cheng said, “I believe we all need to put something positive back into the world.”

“

We can leave a legacy in this world and do something no one else thought of.

IN SERVICE TO INDIGENOUS COMMUNITIES:

Bryan Newland '03, J.D. '07

GOVERNMENT IN SERVICE

Spartans claim a rich history of service in the public sector. The work of MSU alumni has contributed to healthier communities, fostered economic development, addressed pressing societal challenges and strengthened quality of life.

Growing up as a member of the Bay Mills Indian Community, a small tribe located in Michigan's Upper Peninsula, Bryan Newland saw his mother fill tribal leadership positions with a resolute, community-minded ethos.

"Trite as it may sound, it was instilled in my entire family that we all had a role to play in making the world a better place," Newland said.

As his mother did, Newland lived that message through public service for the Bay Mills Community. He served as the tribe's chief judge from 2014 to 2017 before moving into the role of tribal president from 2017 until he moved to Washington, D.C., and joined the U.S. Department of the Interior's Bureau of Indian Affairs.

Today, Newland is working to enhance the quality of life in tribal communities on a national scale as the bureau's assistant secretary. He helps to manage the federal government's relationships with 574 federally recognized tribes spread from the northern slopes of Alaska to the southern tip of Florida, and is specifically tasked to oversee programs designed to boost education, social services, economic development and other elements of tribal life.

"We're trying to turn the relationship between the U.S. and tribes into a positive and collaborative partnership, which it hasn't always been," Newland said.

On any given day, Newland might move from discussions about a \$100 million gaming development to improving a school facility on tribal land to issuing grants to fund Indian-owned small businesses.

"My day is never boring because of the diverse work we handle," he said.

Newland is also playing a leading role in the Federal Indian Boarding School Initiative unveiled last June by Interior Secretary Deb Haaland. The initiative aims to provide an honest, comprehensive review of the troubled legacy of federal boarding school policies, which forcibly pulled thousands of Indigenous children from their communities and relocated them to distant residential facilities throughout the late 1800s and into the 20th century.

To quell the nation's so-called "Indian problem" and force assimilation, these facilities stripped Indigenous children of their identities, languages and beliefs, which disrupted families, created enduring scars and negatively impacted the sustainability of tribal life.

"The first part of the healing process is an honest accounting of the truth," Newland said of the Boarding School Initiative. "It's an important part of resetting the relationship between the federal government and Indian communities and building a better, more collaborative future together."

“

We're trying to turn the relationship between the U.S. and tribes into a positive and collaborative partnership, which it hasn't always been.

IN SERVICE TO MICHIGAN'S 5TH CONGRESSIONAL DISTRICT:

Mitchell Rivard '11

GOVERNMENT IN SERVICE

Spartans claim a rich history of service in the public sector. The work of MSU alumni has contributed to healthier communities, fostered economic development, addressed pressing societal challenges and strengthened quality of life.

Though Mitchell Rivard did not come from a politically active family, he nevertheless found himself pulled to political life and public service.

As a student at Western High in Bay City, Michigan, Rivard organized a voter registration drive for classmates and volunteered for political campaigns.

"It felt important to be active and involved," he said.

When Rivard arrived at MSU in August 2008, political discourse ran rampant as the presidential election approached and campaigning politicians descended upon Michigan. Rivard found the environment intoxicating.

"MSU was an epicenter of political activity in 2008," Rivard said. "Coming from a town of 30,000, this was a big, yet exciting, change."

The energy of the 2008 election, paired with first-year classes at the James Madison College, intensified Rivard's interest in politics and stirred deeper involvement. When Rivard learned that the Michigan Promise scholarship program, a merit-based initiative for first-generation college students like Rivard, was at risk of disappearing as the Great Recession pummeled state finances, Rivard helped steer a team of college students from across the state to lobby for the program's preservation.

Rivard's dedicated work captured the eye of then-Michigan Gov. Jennifer Granholm's office. At 19, Rivard found himself balancing his MSU studies in

Social Relations and Policy with a full-time communications assistant job in the governor's office.

For the past decade, Rivard has worked for U.S. Representative Dan Kildee, whose congressional district includes Flint as well as Rivard's hometown of Bay City. As Kildee's current chief of staff, Rivard manages office operations in Washington, D.C., and Flint, overseeing a 21-member team while acting as the congressman's top adviser on legislative and political issues. The 24/7 nature of congressional work, he admitted, can be exhausting.

"It's definitely a lifestyle," said Rivard, who also serves as co-leader of the House Chiefs of Staff Association, a bipartisan organization of congressional staffers aiming to bring heightened efficiencies and collaboration to Washington.

As a member of Kildee's office, Rivard helped land \$170 million in federal funding to address the water crisis in Flint, including replacing lead pipes and expanding health care resources for Flint residents, and contributed to the 2016 release of local son Amir Hekmati, a former U.S. Marine detained as a political prisoner in Iran.

"Every day brings a chance to go to bat for our communities and constituents in Michigan," Rivard said. "It's important and meaningful work that impacts lives where I come from, and that's what drives me."

“

Working in Congress for one of the House's 435 members is a unique and rewarding opportunity few others have had.

IN SERVICE TO UNDERREPRESENTED VOICES:

Tracy Sherrod '92

VOICES IN SERVICE

Spartans play vital roles in building a more collaborative, connected and inclusive world. MSU alumni are contributing knowledge to the world and enhancing our ability to understand one another, live and thrive.

With her MSU graduation approaching in 1992, Tracy Sherrod stumbled to answer a seemingly simple question from her college roommate, the now-Honorable Maria Ladas Hoopes ('88).

"What are you going to do after graduation?" Hoopes asked.

Sherrod, a Justice, Morality and Constitutional Democracy major at James Madison College, shrugged. MSU, she said, had been such a joy of reading, writing and exploration that she hadn't much considered the future.

Then, Sherrod looked down. Her future, it turns out, sat in her hands.

Holding a book published by the New York City-based Feminist Press, Sherrod called a phone number listed inside the book's cover and inquired about job opportunities. Weeks later, Sherrod left for Manhattan, taking her first step into a now-30-year career in book publishing and showcasing diverse voices.

After two decades with publishing heavyweights like Henry Holt and Simon & Schuster, Sherrod joined Amistad, a division of HarperCollins, in 2013. The nation's oldest imprint devoted to books by Black authors, Amistad's catalog boasts titles from some of the nation's most influential Black voices, including Pulitzer Prize winner Edward P. Jones, National Book Award winner Jacqueline Woodson and legendary Harlem Renaissance writer Zora Neale Hurston. Sherrod is currently the Vice President and Executive Editor at Little, Brown.

"It's important to provide writers of color a platform and opportunity to share their stories according to their preference," said Sherrod. "Adding diverse voices to literature is our gift to the world."

Over the past ten years, Sherrod has introduced some of the most powerful works by Black authors: "Spectacle" by Pamela Newkirk, which details Congolese native Ota Benga's abduction to the U.S. and placement in a zoo monkey house; "Make Good the Promises," a collaboration with the National Museum of African American History and Culture examining post-Civil War Reconstruction; and trailblazing actress Cicely Tyson's recent memoir, "Just as I Am."

"This work is important because of the stories it empowers people to tell, the freedom it allows for honest expression and the insights it gives into American history and systemic racism," Sherrod said.

Spring 2022 titles such as "Miss Chloe" by A.J. Verdelle, a memoir of the author's literary friendship with Toni Morrison, as well as "Where the Children Take Us" by Zain E. Asher, a study highlighting Nigerians' rise as the new model minority, build upon Amistad's enterprising tradition.

"These stories might not otherwise be told," Sherrod said, "and there's still plenty of truth to be shared."

“

Amistad was an exciting place to be because the authors and their works are important.

IN SERVICE TO CONNECTED GLOBAL CITIZENS:

Jesse Juriga '04

VOICES IN SERVICE

Spartans play vital roles in building a more collaborative, connected and inclusive world. MSU alumni are contributing knowledge to the world and enhancing our ability to understand one another, live and thrive.

Sometime in elementary school, Jesse Juriga remembers describing his ideal job to his parents: to sit in a room and brainstorm ideas.

"I'm addicted to the moment of spark—when your brain runs away from you—and without consciously thinking, you are creating," said Juriga, a Belleville, Michigan, native who was a marketing major at MSU.

Now, Juriga isn't sure how he stumbled into his current role as creative director at Google Creative Lab, or if the specific charges of that position organically sprouted around him over the past nine years, but sitting in a room and contemplating inventive ideas consumes much of his professional life today.

A collection of creatives and innovators—designers, filmmakers, coders, technologists, writers and animators among them—Juriga and his Google Creative Lab peers spend their time "making." Sometimes, the end product is an advertisement for a ubiquitous Google product. And sometimes, Juriga's imaginative crew is decoding complicated technology like artificial intelligence for the masses.

"Put simply, we make things that help communicate what Google does and make sure people get the most out of Google's helpful products," Juriga said, noting that his marching orders derive from Google's overriding mis-

sion to make the world's information more organized, useful and accessible to global citizens.

For the Super Bowl in 2020, Juriga's creative squad developed the "Loretta" commercial that earned widespread acclaim and triggered more than a few goose bumps and teary eyes. The ad shared the true story of an 85-year-old man—the grandfather of a Google employee, in fact—using Google Assistant to reminisce about cherished memories with his late wife.

"My favorite things to make are simple, small and human," Juriga said. "They are more than the sum of their parts—not huge shoots with celebrities, but small stories that everyone, everywhere can relate to, even in a small way."

With Google tools like Search, Maps and Reviews used by billions of people around the world each day, Juriga stands committed to highlighting the technology's practicality and, even more, its ability to elevate lives, inform decision making and enrich the human experience.

"This is a lot of responsibility and we take it seriously," said Juriga. "It's important to us, and to me personally, to make sure people know about these tools and can find and use them easily."

“

I'm addicted to the moment of spark—when your brain runs away from you—and without consciously thinking, you are creating.

The Continued Growth of MSU Extension

Over the past two years, MSU Extension's mission has become even more vital. The efforts on this page, in addition to many others, have elevated lives in every county statewide. By increasing access and outreach, sharing crucial knowledge and tackling often-overlooked issues head-on, MSU Extension continues to live up to its name.

Michigan Substance Use, Prevention, Education and Recovery – MiSUPER

People living with opioid use disorder and those experiencing other types of substance misuse are part of a public health crisis in the United States. In Michigan, recent data show increases in opioid-related deaths that may be attributable to the COVID-19 pandemic.

The goal of the MiSUPER project is to increase awareness of opioid misuse in rural communities regarding prevention, addiction treatment options and recovery support, so that community members and health care professionals can recognize signs of misuse, suggest options for treatments and support those in recovery.

In collaboration with the MSU College of Human Medicine Family Medicine and the Health Department of Northwest Michigan, MSU Extension delivers research-based trainings, and the project creates and distributes materials to educate rural communities about opioid misuse prevention.

Creating Healthy Habits Through Nutrition and Physical Activity

MSU Extension's nutrition and physical activity programming gives Michigan adults, families and children access to important information so they can make healthy food choices, increase physical activity and practice food resource management skills.

The Supplemental Nutrition Assistance Program Education (SNAP-Ed) is a partnership with the Michigan Department of Health and Human Services designed to reduce hunger and food insecurity and promote healthy eating habits for people who are SNAP-eligible. In 2021, MSU Extension reached more than 338,000 adults and children through nutrition education, physical activity promotion and policy systems and environmental change initiatives. Programs such as Eat Healthy, Be Active, promote healthy behaviors to reduce the risk of obesity and chronic diseases, and Teen Cuisine, a hands-on cooking program, teaches middle- and high-school students important life skills for healthy eating.

Managing Farm Stress: Stress and Fatigue Stemming From the Daily Work of Farming

An often-overlooked area in farming and agribusiness is mental health. Stress and fatigue can stem from the daily work of farming, and situations can become especially intense when farmers face unexpected hardships unique to the industry. Things like low commodity prices, an on-farm injury or decreased yield due to natural disasters bring challenges that weigh heavily on farm families.

MSU Extension offers a network of resources specifically designed to help those in agriculture identify their stress and manage their mental health. From teletherapy to online learning courses, videos and financial resources, MSU Extension is helping Michigan's farmers cope in an ever-changing industry.

Spartans Connect and Inspire

CELEBRATING A CENTURY

Spartan stalwart Pauline Adams celebrated her 100th birthday in March

After moving to East Lansing from the East Coast in 1947, Pauline Adams spent the majority of her life championing Michigan State. She began teaching in the 1950s, and helped usher in MSU's newly formed Department of American Thought and Language (now Writing, Rhetoric and American Cultures). Adams retired in 1992 at the age of 70, but spent the following 20-plus years on campus teaching non-degree classes and seminars. She is pictured here at a 1969 Spartan basketball game alongside her husband, Walter, a beloved MSU economics professor who served as the university's 13th president from 1969 to 1970. Happy 100th birthday to Pauline Adams, a true Spartan for life.

Where We Belong

From near or far, Spartans are united through action.

Big things happen when Spartans come together. The latest example occurred March 15, when alumni and friends of MSU displayed support for their fellow Spartans on Give Green Day.

This year's Give Green Day was a staggering success, and your impact cannot be overstated. Together, we raised more than \$1.4 million in 24 hours thanks to 7,359 gifts, many from first time donors. A special acknowledgment goes out to the Arizona Spartans. President Ann Burnett and the group rallied to raise over \$40,000. Every gift makes a difference. Thanks to all for sharing your Spartan spirit.

That spirit was alive and well during May's commencement ceremonies, where we celebrated more than 8,000 graduates. Congratulations to the class of 2022; welcome to the alumni family.

We'd also like to extend congratulations to our 2022 Alumni Grand Awards recipients. We look forward to gathering on campus for the Grand Awards Gala on Friday, Sept. 23. Learn

more about this year's honorees, an impressive group of Spartans making a difference on and off campus, on page 55.

It's clear that Spartans everywhere are driven to give back. Spartans Serve Week is designed to give everyone in the MSU community the chance to do just that. Happening Sept. 17-25, this inaugural Spartans Serve Week offers a host of ways to get involved. Mark

your calendars and join us in illustrating our passion for making the world a better place.

We have appreciated recent alumni input around our new multicultural center on campus, a community-driven project that will create a place for students to examine the intersections of identity and unity and utilize their collective voices to enact positive change. I also want to thank our alumni club leaders for your participation in "Alumni University," which covered the numerous ways our clubs can connect, serve and invest in Michigan State University.

As we lay out our plans for summer and beyond, the common thread is clear: Spartans succeed together. And because of that, we will continue to serve and invigorate the communities to which we all belong.

Go Green!

A handwritten signature in black ink that reads "Nick McLaren".

Class Notes

News from Spartans Around the World

1960s

CHARLES V. DYKE, '66 (Business), recently retired as CEO of Global Hospitality Consultants, a hotel, golf and ski resort management business.

MICHAEL S. JOLLY, '66 (Social Science), M.A. '73 (Education), was recently inducted into the National High School Athletic Coaches Association Hall of Fame. Coach Jolly continues to coach football at Warren De La Salle Collegiate.

JIM SARGENT, M.A. '68, Ph.D. '72 (Both in Social Science), recently published his 10th novel, "The Frightened Physicists," a mystery novel with a historical fiction twist taking place during the beginning of the Cold War. The novel is the fifth in Sargent's "Mickey Matthews Mysteries" collection.

1970s

DORIS D. YATES, M.A. '74 (Social Science), Ph.D. '82 (Education), recently retired from California State University, East Bay after 40 years of service. Yates will become professor emeritus.

VICTORIA THRASHER, '76 (Social Science), was recently promoted to senior vice president of Human Resources at Oracle Corp.

1980s

JUDY WINTER, '80 (Communication Arts and Sciences), has been recognized on the 2021 George H.W. Bush Points of Light Inspiration Honor Roll for her outstanding volunteerism through the Eric 'RicStar' Winter Music Therapy

Camp at MSU, which she co-founded in 2003 to honor her son's legacy.

SUSAN STACK, '83 (Communication Arts and Sciences), was recently added to the faculty at Old Dominion University in Norfolk, Virginia. She is also on the faculty at Harper College in Palatine, Illinois.

BETH OLIVER, '84 (Communication Arts and Sciences), was recently promoted to vice president, director of Sales & Marketing at Offshore Sailing School, based in Fort Myers, Florida. Oliver joined the 59-year-old company in 2013. Offshore Sailing School is one of America's top sailing schools with six resort locations on Florida's Gulf Coast and in the British Virgin Islands.

BEVERLY ROBERTS-ATWATER, Ph.D. '84 (Education), D.O. '92 (Osteopathic Medicine), has been appointed interim chair of Physical Medicine and Rehabilitation at Eastern Virginia Medical School. Roberts-Atwater's position is effective Oct. 1, 2022.

ROGER GRIFFIN, '86 (Arts and Letters), recently made his New York theater debut as the producer and author of the musical "After Happily Ever After." This grown-up musical comedy tells the story of what happens after your favorite fairy tales end.

DAVID LEAHY, '88 (Education), recently retired after teaching music and physical education for 34 years in the Dearborn Public School system.

WILLIAM SULLIVAN, '88 (Natural Science), has joined Vanderbilt University as professor and residency program director of Physical Medicine and Rehabilitation in Nashville, Tennessee. Sullivan was previously associate professor at the University of Colorado School of Medicine Department of Physical Medicine and Rehabilitation. He is a past president of the North American Spine Society, the largest multi-specialty medical spine society in the United States.

LAURA REYNOLDS, '89 (Social Science), was recently named provost and vice president of academic affairs at Missouri Western State University in St. Joseph, Missouri.

1990s

EDWARD MUNDT, '90 (Business), recently retired as controller from VANTAGE Electrical Group.

MONIQUE FIELD-FOSTER, '92 (Agriculture and Natural Resources), was recently named executive partner and co-chair of the Governmental Affairs Practice group at Warner Norcross + Judd LLP. Field-Foster was also recognized as one of the '50 Names to Know in Lobbying' by Crain's Business.

SUSAN BOSCH, '93 (Business), has recently joined the AZEK Co. in Chicago, Illinois, as vice president of Finance for Global Operations. The AZEK Co. is an innovative manufacturer of beautiful, low maintenance and environmentally sustainable outdoor living products.

JEFF LAMBERT, '93 (Communication Arts and Sciences), the chairperson of Michigan-based PR and investor relations firm Lambert

Global, was recently selected to serve as the PROI global chair-elect. Composed of more than 85 PR and communications businesses in 165 cities and 55 countries, PROI Worldwide is a global leader in the communications industry.

EDWARD R. ROSICK, D.O. '93 (Osteopathic Medicine), an associate professor in the MSU College of Osteopathic Medicine, recently published "Deep Roots," a surreal story set in the urban heart of Detroit. The book tells the story of a man just released from prison, who frantically searches for the reason strange, painful, hair-like growths have begun to infest his body before realizing the horrifying condition may not only be deadly to him and those he loves, but to the entire world.

REGINA STAUDACHER, J.D. '93 (Law), was recently appointed lead of a seven-member interdisciplinary group of professionals in the specialty tax and incentive spaces of Winthrop & Weinstine, a prestigious law firm based in Minneapolis, Minnesota.

SHANNON POLK, '94 (James Madison College), was recently named president and CEO of the Ann Arbor Area Community Foundation in Ann Arbor, Michigan. The AAACF is a philanthropic organization with a focus on enriching the quality of life in Washtenaw County.

KATHERINE ARMSTRONG, '96, M.S. '03 (Both in Agriculture and Natural Resources), was recently named director of Wilderness, Wild and Scenic Rivers for the U.S. Forest Service in Washington, D.C.

BRIDGET ZAHRADNIK, '96, M.A. '02 (Both in Education), was awarded the Presidential Excellence Award for Science and Mathematics Teaching. She was one of 117

individuals recognized nationwide with the highest U.S. award for science and mathematics teachers and mentors.

MATT BROWNELL, '98 (Agriculture and Natural Resources), was recently promoted to vice president and general manager of The Christman Co.'s regional office in Raleigh, North Carolina. The Christman Co. is a construction management and real estate company with eight offices across the United States.

ANTHONY PECCHIO, '98 (Engineering), was recently promoted to senior vice president of The Christman Capital Development Co. He assists in financing and partnership structures for federal and state historic preservation tax credits.

2000s

JACOB KULHANEK, '03 (Engineering), was recently promoted to senior vice president and general manager of the Christman Co.'s regional office in Grand Rapids, Michigan.

DANIEL SOLOMON, '03 (Social Science), recently joined Miller & Chevalier as member in the International Department. Miller & Chevalier is a top-ranked Washington, D.C., law firm sharply focused on targeted areas that interact with the federal government.

NATHAN OHLE, '05 (Business; Social Science), an international expert in economic development and leader of public, private and nonprofit organizations, was named president and CEO of the International

Economic Development Council in Washington, D.C.

SHELBY NEWMAN, '06 (Lyman Briggs College), was recently named manager of IT Communication, Training and Change Management at Perrigo Co. in Grand Rapids, Michigan.

LANA ZOET, '06 (Agriculture and Natural Resources; Honors College), was recently named principal at architecture and engineering firm SmithGroup, where she leads a regional Higher Education studio based in Madison, Wisconsin.

STEVEN HOLBEN, '07 (Business; Honors College), was recently selected to join the Emerging Talent Advisory Council for the Equipment Lease Finance Association.

2010s

KATHERINE WITHERS HESS, M.S., '10 (Agriculture and Natural Resources), was recently named partnerships lead at Functionland, a Web3 startup commercializing Blockchain-Attached Storage (BAS) and monetizing open-source software development in Toronto, Ontario.

JILLIAN TREMONTI, '11 (Arts and Letters), has been appointed as the executive director of Grayling Main Street & Downtown Development Authority.

BRITTANY HOLMES, '13, M.A. '17 (Both in Communication Arts and Sciences), recently founded Did Juno LCC, an inclusive and anti-racist strategic communication training and consulting business.

BENNIE FOWLER, '14 (Social Science), former Spartan football standout, NFL Super Bowl champion, and motivational speaker and author, has joined Podium Risk Management as partner.

JEFF DINSER, '15 (Agriculture and Natural Resources), founded the freeze-dried snack company Popside Candy. A unique and distinctive brand was developed around the product's "cloud-like" airy texture. These delicious candy puffs are available for purchase online, wholesale, in retail and in market booths.

EMMA IRWIN, '15 (Education), has accepted a position with the NBA in Digital and Social Content Publishing.

VALERIE NUHFER, M.S. '16 (Business), was recently named to the Easterseals New Jersey board of directors. Easterseals is the largest disability services not-for-profit in the state of New Jersey. Nuhfer is the vice president and change execution manager of Deutsche Bank's Chief Transformation Office. For more than 20 years, Nuhfer has provided leadership in strategic planning and transformative board level reporting.

KENNETH WILLIAMS JR., '16, M.A. '18 (Both in Communication Arts and Sciences), recently hosted the red carpet for esteemed media outlet Blavity News at the 53rd annual National Association for the Advancement of Colored People Image Awards.

2020s

BRENTON THURMAN, '21 (Business), NICK YOUNG, '21 (Business) and COLIN HENDRICKSON, '21 (Social Science), have co-founded the

money management app, Money Pickle. Money Pickle offers anonymous financial advice in real time to users.

WORLD CHANGERS

If there's one thing that drives the Spartan spirit, it's the motivation to make a difference. Spartans strive to address the world's most pressing problems each and every day.

Alumni Grand Awards recognizes the best of the best — those alumni who are doing wonderful things and making an impact daily in their companies, communities and for Michigan State University.

Michigan State University annually recognizes Spartans who positively reflect and enhance the prestige of the university in five categories:

Alumni Service Award

Presented to Michigan State University alumni who have demonstrated service to MSU and/or meritorious public service on a local, state, national or international level.

Distinguished Alumni Award

Presented to alumni who have differentiated themselves by obtaining the highest level of professional accomplishment in their field.

Honorary Alumni Award

Presented to non-alumni candidates who have made an outstanding impact on behalf of Michigan State University on a local, state, national or international level.

Philanthropist Award

Presented to individuals, families, associations, corporations or foundations with a proven record of providing major, ongoing financial support and leadership to Michigan State University. Their generosity encourages others to take leadership roles in philanthropy toward MSU.

Young Alumni Award

Given to Spartans age 40 or younger who have distinguished themselves through a high level of professional accomplishment early in their career.

To learn more about the Alumni Grand Awards program or nominate an exemplary Spartan, visit go.msu.edu/AGA-22-More or use the QR code below.

76th Alumni Grand Awards Gala

2022

This group of truly impressive Spartans will be honored at the Alumni Grand Awards Gala, held Friday, Sept. 23, at the Kellogg Hotel and Conference Center.

The event includes a reception with hosted bar, decadent meal and the opportunity to meet and mingle with the recipients.

We invite you to save the date for an opportunity to meet and learn more about this inspiring group. You can participate in this celebration online or by attending the gala in person. Registration will open in August.

COURTESY FACILITY FOR RARE ISOTOPE BEAMS

SPEED MATTERS: ACCELERATING THE FUTURE OF NUCLEAR SCIENCE

For 13 straight years, Michigan State has maintained the No. 1 ranked nuclear physics graduate program. Bolstering MSU's reputation in the field is the Facility for Rare Isotope Beams, a new U.S. Department of Energy Office of Science user facility that marked the start of scientific user operations May 2. The accelerator at FRIB will propel atoms to half the speed of light, resulting in collisions that produce rare isotopes that, until now, were only found in the cosmos. FRIB will enable scientists to make discoveries about how the universe formed, while advancing innovation in medicine, nuclear security, environmental science and more. go.msu.edu/DiscoverFRIB

SPARTANS MAKE A DIFFERENCE

When you're a Spartan, you're part of something bigger than the campus' 5,200 acres. We're a global community more than 500,000 strong and we're passionate about making the world a better place.

**GREAT MINDS
THINK ALIKE.
EXCEPTIONAL MINDS
THINK DIFFERENTLY.**

Together, Spartans drive discoveries that help make a difference in the world. In the area of global health, MSU is focused on research solutions to challenges such as COVID-19, cancer and Parkinson's Disease. United by our curiosity and commitment to improving the lives of others, we're partnering for a healthier, more sustainable future. **Spartans Will.**
