One Spartan Family

Founded by MSU faculty and staff in 1937 as a way for the MSU community to borrow and save, our mission to help members achieve their dreams remains unchanged. Today, over 300,000 Spartans proudly call MSUFCU their financial institution.

For nearly 84 years, we have been an integral part of the MSU community. During this time, our partnership with MSU has grown to include the Dean's Choice Grant, The Hatch, financial education sessions to serve all faculty, staff, and students, and the MSUFCU Jazz Artist in Residency Endowment. In 2017, we announced a \$5.5 million donation to MSU to support 10 university programs: Broad Art Museum, College of Arts and Letters, College of Business, College of Communications Arts and Sciences, College of Music, College of Social Science, Residential College in Arts and Humanities, Science Gallery, Wharton Center, and WKAR.

We strongly believe that showing our Spartan Spirit by investing in the university and the local community creates a place where people are proud to live, work, and visit.

“You can be proud, as I am, of how the university addressed student and employee safety in the past year while supporting our institutional momentum.”

Dear Spartans

I know many of us eagerly anticipate a return to our prepandemic lives. I personally believe that broad public participation in vaccination is essential to continuing our progress, and I have been delighted with MSU's direct participation in community and campus vaccination programs.

You can be proud, as I am, of how the university addressed student and employee safety in the past year while supporting our institutional momentum. I am eagerly looking forward to a fall semester with more students, faculty and staff on campus.

I'm also pleased we could offer undergraduates and graduate-professional students in-person graduation ceremonies at more than 50 events held outdoors this spring. We honored 9,000 undergraduate and graduate degree earners.

This year, more than 140 students were recognized with spring 2021 Board of Trustees Awards. The award is given to graduating seniors with the highest scholastic average, a 4.0 GPA. It has been a year of many student honors, with MSU students awarded prestigious Beinecke, Gates Cambridge, Marshall, Mitchell and Truman scholarships, and two students earning Goldwater Scholarships.

For the seventh consecutive year, MSU was named a top producer of both Fulbright scholars and Fulbright students in the United States. These programs support academic exchanges with more than 150 countries.

Also winning honors this year was WKAR, named Michigan Public Television Station of the Year by the Michigan Association of Broadcasters

for the ninth time in 10 years. And our student-run radio and media organization, Impact 89FM, earned College Radio Station of the Year honors for the 17th time.

This season remains a busy one for MSU as we work to complete and begin to release three key strategic plans. The first, examining relationship violence and sexual misconduct, was released in April. Our diversity, equity and inclusion planning and institutional strategic planning continue at this writing, as our campus community works to turn our vision and values into action.

I was privileged to get to know alumnus, entrepreneur and philanthropist Eli Broad before his passing April 30, and all our hearts have been with Edythe and the Broad family. He personified excellence from the classroom to the boardroom and, in his engagement, he embodied what it means to be a Spartan.

I have greatly enjoyed my Zoom conversations with alumni and getting to know so many of you during the past year, and I am grateful for your continued interest and support.

And although our spacious, beautiful campus has remained open to all visitors who observe our safety protocols, I hope this fall you will feel comfortable and as welcome as always to cheer on our teams, enjoy activities and gather again on the banks of the Red Cedar.

Until then, I hope you enjoy a safe and joyful summer. Go Green!

A handwritten signature in dark ink, reading "S. L. Stanley Jr."

Winter 2021 Spartan magazine content is available at: go.msu.edu/spartan-winter-21

LEAVING YOUR MARK

As graduation approached, I began to think about the class of 2021 and how profoundly different their experiences have been during the pandemic. My hope is that these experiences might serve them well as they seek to build a more just, healthy and creative world. I can only imagine what future stories we might tell here in the Spartan magazine about their contributions.

Perhaps they will be like Genevieve Gillette, a 1920 graduate. We all know about the Roaring Twenties—it was a time of historic and dramatic social and political change, and many MSU graduates put their good education to practical use.

A short four years after graduation, Genevieve was helping to locate and raise public support and funding for parks throughout the state of Michigan. We can thank this pioneer in MSU's landscape architect program for Sleeping Bear Dunes National Lakeshore, Pictured Rocks National Lakeshore, the Huron-Clinton Metroparks system and the sand dunes area of Lake Michigan between Grand Haven and Muskegon. Places Michiganders and tourists enjoy every day in our state.

In this issue of the Spartan we asked several Spartans to share their truths and reveal some sage advice born out of their life experiences and passions. A poet, a lawyer and an entertainer tell us how they turned trouble into triumph. We also pay tribute to our most generous alumnus, Eli Broad, who invested in the future of MSU. Read their stories and you'll be inspired by their talent, empathy and commitment to make the world better for others.

LETTERS

SPARTAN PRIDE

Thank you for all the wonderful and wide scope articles you provide in the alumni magazine. It makes me feel proud to be an alumna ('85). My husband ('80) and son ('08, '12) are also alumni of MSU. As you can tell we are a Spartan family!

Our son is a now a physician in Alaska and was recently recognized for improving immunization rates in rural and remote areas. He is an internal medicine and pediatric hospitalist at Alaska Native Medical Center in Anchorage and internal medicine and pediatric primary care at Norton Sound Health Corporation in Nome. In my opinion, he is the epitome of Spartans Will.

Annette Pohl, '85
PERRINTON, MI

GREETINGS FROM KNOXVILLE

Thanks for producing a great Spartan magazine. It is a joy to receive it each season! Keep up the good work and enjoy good health up there in the frozen northland. I count myself fortunate to have degrees from MSU, U-M and MUSC in Charleston, South Carolina.

Thanks to you all!

Larry E. Davis, M.D., '73
KNOXVILLE, TN

SUCCESS AND GENEROSITY

I would be writing this note even if I didn't share the same last name of Mr. Kirk Mayes (a Spartan Profile in the Fall 2020 issue). His work with Forgotten Harvest is such a generous Christian act of charity and so ecologically correct! To spare our landfills and to feed the hungry is indeed a Spartan success story. Go Green!

Lynn Mayes, '58
PORT AUSTIN, MI

BUILDINGS BRING BACK MEMORIES

First, we were delighted to see in the Winter 2021 "Spartan" issue, appreciation of my father G. Malcolm Trout's research on homogenized milk. When we get back to MSU we always make a point to stop for ice cream at the Dairy Store in the G.M. Trout Food Science and Human Nutrition building.

Second, I loved recognizing the big Auditorium building and learning of rebuilding the doors. I was amused that most of the names of dignitaries you included as speaking or performing there in the past 80 years are contemporaries. I remember Marian Anderson, Vladimir Horowitz and the Ballet Russe de Monte Carlo in addition to all the Saturday night travel live lecturers (pre Rick Steves days). My husband reminded me of the military balls and J-Hop dances on the controversial all-purpose flat floor construction. Also, all our registration for classes (with IBM punch cards) each term took place there. My dad served on the concert selection committee chaired by Dr. Stanley Crowe in the late 1940s, and I'd love to see a re-cap article on all the performers and Broadway productions there over the years.

Finally, cheers for a new pipe organ for Memorial Chapel where Monte and I were married in May 1960. I'd be interested in an article about the chapel's annual usage (before COVID restrictions) including how many weddings have taken place since the construction right after WWII, and what rental costs are today.

News & Views from MSU

And the band *can* play on!

The new College of Music Billman Pavilion facility ushered in a healthy and safe learning environment for music instruction, rehearsals and concerts that otherwise would not have been possible before its construction last year.

(Story on page 8)

Taking Note

The timing and completion of the Billman Music Pavilion in the spring of 2020 could not have been better—you might say it was custom made for a pandemic.

The new facility ushered in a healthy and safe learning environment for music instruction, rehearsals and concerts that otherwise would not have been possible during the last year.

For one thing, the College of Music's overall space increased by 40%. And for another, a top-of-the-line HVAC system refreshes air four times per hour. Both have proven critical in helping music students progress and prosper despite COVID-19.

Some of the best architects and acoustics experts around worked with the College of Music to customize the pavilion which sits atop an astounding 8 million pounds of concrete.

Part of the magic of all that extra concrete lies between sets of double walls and double floating floors, which greatly improve the ability of musicians to hear themselves and each other—always a good thing, but especially now when musicians must maintain wide social distancing space.

At the same time, technology upgrades like multi-channel audio recording and high-

definition cameras and monitors helped create livestreamed performances and master classes with remotely visiting artists and scholars.

The original Music Building, completed in 1939, was the first academic building on MSU's campus designated solely for the liberal arts. The adjacent Music Practice Building was added just a few steps away in 1968. Both remained largely unchanged structurally, and for decades, music students have thrived in spite of the buildings' age and acoustical challenges, and faculty and staff have made the best of instructional and performance spaces that were no longer adequate for teaching and making music.

The official ribbon cutting is scheduled for October 1, 2021, but the Billman Music Pavilion already has been inaugurated through the determined artistry of hundreds of musicians and singers since the minute it opened its doors.

THE BEAUTY OF THE NEW DEAL RELIEFS REMAIN

The supervisor of the Michigan Sculpture Program for the WPA, Samuel Cashwan, designed the Art Deco limestone reliefs framing the original southwest entrance. They depict images of dance and performance and preserve history while welcoming the addition of the Billman Music Pavilion.

Space Garden

Following the successful landing of the Mars Perseverance rover, our imaginations have been captivated by the possibility of interplanetary colonization. But cool your jets, there's a big, outstanding issue: food. If humans spend long stretches of time in space, they can't pack all their food before the trip. They'll have to grow some en route, which is no easy feat.

For some of us gardening on Earth is tricky enough, but in space, crops face the most unusual of conditions like microgravity, radiation, freezing temperatures and a lack of natural light.

With the support of NASA, the lab of MSU-DOE Plant Research Laboratory scientist Federica Brandizzi has been studying how plants survive in space conditions. In a new study, they start revealing how a plant system—which helps plants

manage various types of earthly stresses, such as extreme heat—might function in space.

The survival mechanism is called the unfolded protein response. Putting plants in highly weird situations, such as space, has helped the researchers better understand UPR and the role they may play in protecting plants on Earth.

GOING GREEN BY GOING PINK

Working with the university's Infrastructure Planning and Facilities, the MSU Plant Science Research Greenhouse Facility installed colored LEDs inside two of its greenhouse ranges to cut energy consumption, save money and power research that's helping Michigan's farms and farmers.

"This project combines this special group of people to bring new technology on campus," said Erik Runkle, a professor in the Department of Horticulture and an MSU Extension specialist. "With IPF, we're bringing a cost and energy savings to campus along with benefits to science as well."

Light-emitting diodes (LEDs) use less energy than conventional bulbs. Some emit specific colors while others emit white light. Red fixtures are the most efficient at converting electricity into the light plants use for photosynthesis, Runkle said. Plants also need a gentle splash of blue light, which is provided by a smaller number of white LEDs. The red and white mixture are what creates the greenhouses' pink glow.

FACULTY VOICE

“ I sit on a call, there’s about 13 federal agencies who have their sleeves rolled up to try to backfill gaps in our system, and make sure that we’re doing a good job and being a good steward of the vaccine. I consider the vaccine the dose of hope. And I personally believe hope is something that should be fairly and equitably distributed to all people.

— Debra Furr-Holden, C.S. Mott Endowed Professor of Public Health, Associate Dean for Public Health Integration, Director of the Flint Center for Health Equity Solutions

BREATHING ROOM

To keep Spartans on campus safe, Infrastructure Planning and Facilities at Michigan State University has worked to install air purifiers to further protect against COVID-19.

IPF has installed more than 60 air purification devices in campus buildings and 238 in campus elevators. The new air purifying technologies on campus

include needlepoint bipolar ionization, a process which releases ions into the air neutralizing pathogens; UV-C, which uses ultraviolet light to clean the air; atmospheric cold plasma, which kills viruses with oxidizing molecules; and portable high-efficiency particulate air filtration, which cleans the air with a filter that traps viruses.

MSU REMOVES OUTDOOR MASK REQUIREMENT

With recent changes by the Centers for Disease Control and Prevention (CDC) and the Michigan Department of Health and Human Services (MDHHS) regarding COVID-19 pandemic protocols, masks will no longer be needed in outdoor settings on MSU’s campus or MSU-affiliated properties for individuals or gatherings of 100 people or less. The change became effective May 10.

Face coverings are still required while indoors on campus or MSU-affiliated properties. Off campus, the university continues to urge Spartans to follow CDC guidelines.

1,000

people a day receive the COVID-19 vaccine at the MSU Pavilion

Seven MSU Students Earn Prestigious Scholarships

Gregory Marchal has been named Michigan State University's 17th Truman Scholar. He is one of 62 students from 51 U.S. colleges and universities selected as scholars.

Marchal is an Honors College junior majoring in economics with a minor in social science quantitative data analytics in the College of Social Science and a minor in political economy in James Madison College.

The Truman Scholarship Foundation recognizes college juniors with exceptional leadership potential who are committed to affecting change through public service.

Jasmine Jordan, an Honors College political science senior who grew up in Detroit, has been named as a Gates Cambridge Scholar. The scholarship will support Jasmine as she pursues her Master of Philosophy in criminological research at the University of Cambridge. Jasmine is one of only 24 U.S. scholars to be offered a place at Cambridge in 2021.

MSU PLS senior Maysa Sitar has been awarded a highly prestigious George J. Mitchell Scholarship, one of only 12 students honored with the national scholarship. The Mitchell Scholarship is awarded by the U.S.-Ireland Alliance and pays for 12 American undergraduates to spend a year studying in Ireland.

Brent Strong, an Honors College senior majoring in physiology in the College of Natural Science, has been named a Marshall Scholar. Strong plans to pursue a Master of Science in statistics at the University of Glasgow for his first year, and then in population health sciences at the University of Edinburgh for his second year.

This year 46 Marshall Scholars were selected from 1,180 applicants from 35 institutions.

Additionally, two Michigan State University students are among the 410 scholars selected for the 2021 Goldwater Scholarship. The program provides funding for undergraduate tuition and living expenses for students committed to careers in science, mathematics or engineering. MSU's 2021 Goldwater Scholars are Charles Hultquist, an Honors College junior majoring in physics and advanced mathematics in the College of Natural Science; and Andrew McDonald, an Honors College junior majoring in computer science in the College of Engineering; and statistics, and advanced mathematics in the College of Natural Science.

Wisdom Henry, an Honors College junior majoring in history, and urban and regional planning in the College of Social Science, has been selected as one of 16 students from a pool of 95 nominees across the country to receive a Beinecke Scholarship.

The Beinecke Scholarship pays for up to \$34,000 in support for graduate school for students studying the fields of art, humanities or social science.

PARTNERSHIP CREATES FIRST U.S. DEVELOPER ACADEMY IN DETROIT

Apple and Michigan State University announced that they will partner to launch the tech giant's first United States-based Developer Academy in Detroit.

"We're grateful for the partnership and the opportunity it brings to Michigan," said MSU President Samuel L. Stanley Jr., M.D. "Apple is the perfect partner for us to help educate and prepare a diverse generation of coders, tech leaders and entrepreneurs, and Detroit—Michigan's innovative technology and premier urban hub—is the right location for this academy. There is tremendous potential for this project moving forward, and we're excited to get started."

Apple's partnership with MSU began with the iOS Design Lab on campus and continued with community-based learning opportunities around technology in Detroit. The academy, which will be located in downtown Detroit, will welcome its first cohort of students in Fall 2021. MSU is currently accepting student applications.

Additionally, MSU is seeking marketing, design and coding specialists to join its team at the academy. These positions are available at careers.msu.edu.

Stay up to date on the latest developments at go.msu.edu/academy

4,500

Estimated number of students expected to participate in the Apple Developer Academy in Detroit during its first 5 years

The Future is Bright

The past year has been a true test of Spartans' will, and we are so proud of the many ways in which our university community rose to the challenge. We would like to extend a special thank you to our alumni for the outstanding support you demonstrated through some of the most difficult times in the history of the university. From sharing your professional expertise to making donations to COVID-19 emergency assistance funds, you stepped up when your fellow Spartans needed you most.

As we transition to summer, we are optimistic for things to come. Here in East Lansing, we will see an increase in activity on campus with the return of more in-person classes and events in the fall. It begins, most notably, with spring commencement ceremonies. Congratulations to our resilient graduates! And kudos to this year's Board of Trustees GPA Award winners. Whether it's to cheer for your favorite Spartan or to move in a next-generation Spartan, we hope to see you back on campus soon.

There's a multitude of extraordinary work being done to enhance the university's impact and imprint across the state of Michigan and beyond. Our exciting new partnerships with Henry Ford Health System and Apple are just the beginning. Both are noteworthy expansions of the university's outreach and engagement efforts and our investment in the metro Detroit area.

The new STEM Teaching and Learning Facility, a first-of-its-kind mass-timber building constructed with funding support from the state of Michigan, is another example of Spartan innovation at its best. This new educational and research space houses cutting-edge facilities designed to teach STEM disciplines in more effective ways and promote student success. We look forward to seeing students and faculty in the new facility this fall.

The future is looking exceedingly bright as we continue to find new and innovative ways to meet and exceed expectations as a preeminent land-grant institution.

As we culminate three campus-wide and interconnected strategic initiatives—Relationship Violence and Sexual Misconduct Plan, Diversity, Equity and Inclusion Plan and university Strategic Plan—we look forward to further opportunities for engagement with alumni regarding institutional goals and priorities. Alumni are not only an integral part of the rich history of the university—they play an integral role in shaping its future. Together we will reach new heights.

Go Green!

Professor On The Road

Troy Hale took his students on a virtual roadtrip to learn important lessons from the field

After the announcement that most classes at the university would continue in an online format for the spring semester, Hale, a professor of practice in the MSU School of Journalism, decided he would teach classes from his vehicle, remotely, and travel across the country. He purchased a camper attachment for his pick-up truck through Facebook marketplace and spent the last weeks of 2020 prepping for a semester-long journey on the road—an initiative he calls “Professor on the Road.”

Hale reached out to the community for recommendations on where he should travel. Taking the best suggestions, he compiled them into a Google map, with loose plans to hit as many recommendations as possibly over the duration of the semester.

With his vehicle equipped with a bed and a make-shift outdoor shower, Hale began his journey in February and made his way west to San Diego, California, capturing breathtaking footage along the way.

In With the New, as a Nod to the Old

Munn Ice Arena is kind of old, but, honestly, that's kind of a compliment.

Completed in 1974, the low-lying, metal-sided building is without a doubt the only athletic facility in the U.S.—and possibly the entire world—that is tucked into the side of a documented 16,000-year-old prehistoric inland sand dune. If that isn't special enough, there's a grove of pine trees growing atop the sand dune, making Munn one of the few places on campus where you can sing the lyrics to MSU Shadows, “beneath the pines we'll gather,” and actually mean it.

But there's also something to be said for having the latest, greatest, shiniest athletic facilities. When Munn Ice Arena's long-awaited renovation is complete, it will be the best of both worlds.

The 35,000-square-foot addition will bring offices, conference rooms and administrative spaces out of the dark underbelly of the arena and into natural light on the main level.

A weight room and training room will mean that student-athletes won't have to trek down Red Cedar Road to the football building for conditioning. There will be a theater room for watching film, a space for studying, a place to practice shooting and brand-new locker rooms that will stand out to new recruits who

are likely trying to choose between some of the best hockey programs in the country.

And for the fans: a beautiful and well-marked “front door” at the building's south entrance and an MSU hockey hall of fame to welcome them inside.

The Munn renovation project is being funded solely through philanthropy, and while construction has largely been paused due to the COVID-19 pandemic, fundraising continues.

We are looking forward—when we can gather again and it's night two of a home-and-home against UofM, and MSU is winning and the students are going insane in the northeast corner and That One Guy is yelling at the refs, and That Other Guy is dancing to the Spartan Brass during intermission, and the whole place feels like the roof might pop off when the clock finally runs out and we've swept the series? It will be better than ever.

There is still plenty of time to leave your mark on Munn. Contact Associate Athletics Director Mark Schoenl at mschoenl@ath.msu.edu or 517-432-4610.

Strategic plan to address sexual assault prevention released

After several years of research and analysis, Michigan State University recently released an institution-wide plan to address sexual assault, sexual harassment, relationship violence and stalking issues that collectively will help foster a safer campus community.

The Relationship Violence and Sexual Misconduct strategic plan builds on the work of the RVSM Expert Advisory Workgroup, which has been a major driver of RVSM efforts at MSU.

Upon his arrival in 2019, President Samuel L. Stanley Jr., M.D. asked the workgroup to develop a five-year strategic plan. The RVSM strategic plan is designed to harmonize with the Diversity, Equity and Inclusion Plan and the MSU Strategic Plan.

“Since I arrived at MSU, I’ve been extremely grateful for the expertise and knowledge on the RVSM Expert Advisory Workgroup,” Stanley said. “Their leadership is instituting real change at our university. Under their advisement, it was evident early on that we needed a plan to continue the progress we’ve already made. Addressing global problems through both action and understanding is part of our Spartan way.”

“We have been developing a strategic plan around RVSM for the past few years, focusing on a values-driven approach,” said Andrea Munford, workgroup co-chair. “We believe this is a comprehensive plan to respond to

what we have been hearing from the campus community.”

MSU partnered with the Michigan Department of Health and Human Services Division of Victim Services on several initiatives in this RVSM strategic plan.

“This plan represents a groundbreaking institutional approach to culture change that will serve as a model for other colleges and universities throughout the U.S.,” said Debi Cain, executive director of the Division of Victim Services at the Michigan Department of Health and Human Services. “We look forward to continuing our partnership with Michigan State University and working toward our shared vision of creating better services for survivors while implementing long-term strategies to prevent sexual violence on college campuses.”

The RVSM strategic plan aims to increase help-seeking rates and decrease the incidence of RVSM by developing trauma-informed, intersectional programs to address the needs of MSU’s diverse communities.

The plan outlines several recommendations along with a list of

actions and a timeline for measuring this work to track and evaluate the university’s progress toward meeting the goals of the presented initiatives.

“We heard clearly from MSU students, faculty, staff and alumni that we need a significant culture change in our institutional approach to RVSM,” said Dr. Rebecca Campbell, workgroup co-chair. “We have worked on identifying policies, programs, training and initiatives that will transform services and prevention and increase accountability.”

The RVSM workgroup will oversee the implementation of changes to policies, organizational structure and prevention programming in partnership with the Office for Civil Rights and Title IX Education and Compliance; the Prevention, Outreach and Education Department; the MSU Sexual Assault Health Care Program; the RVSM Policy; and several other initiatives that promote a safer campus.

A full list of changes MSU has made to address RVSM can be found on the Our Commitment website.

go.msu.edu/rvsm-plan

RVSM STRATEGIC PLAN KEY INITIATIVES

- Expanding trauma-informed services
- Building trauma-informed culture
- Strengthening RVSM policy violations, sanctions and discipline process
- Assessing resources and supports for respondents
- Strengthening RVSM prevention programming
- Creating respectful work environments
- Promoting accountability

Invincible Grit

Dalal Salomon turns the table to put people first in financial advising. BY DEVON BARRETT, '11

Dalal Salomon didn't have her sights set on finance.

But finance found her in 1982, when a firm in the Washington, D.C., area invited her to interview for a position. The firm wanted to hire at least one woman into that year's class of entry-level trainees, and Salomon was the only one who applied.

It was there, in an office and an industry dominated by macho middle-aged white men with Ivy League backgrounds, that the young, introverted, midwestern immigrant woman found her calling.

Salomon was two years old when her parents—both originally from Palestine—migrated with their four children from their home in Honduras to Flint, Michigan. They had \$1,500 saved up, which they used to buy a small neighborhood grocery store with an apartment above, where the young family would live. They all became U.S. citizens five years later, on August 23, 1962.

Growing up, Salomon's own world was very small. She didn't have many friends, she didn't socialize much with other children outside of school, and while college was encouraged, the idea of "going away" to a university was inconceivable as a young woman in her protective household.

But Salomon saw her future somewhere else—somewhere bigger, outside of the familiar confines of home.

So she did the opposite of what her parents wanted her to do: She applied to Michigan State, resolved to pay for it on her own, and headed off to East Lansing. It was the first time she'd ever been away from her family.

It wasn't easy. She couldn't always afford books, and she didn't always devote herself fully to her studies. But she worked as many odd jobs as she could handle to keep the tuition

Michigan; and away from a safe predictable life. It was the beginning of my journey to find my voice and my power."

She put both to good use in her early years as a financial advisor.

Salomon was frequently one of the only women in a male-dominated field. And the offices were competitive, bullpen-style setups, where cold-calling, stock

“ At every turn, I followed my own course in life and in my career. It was never easy. I had to fight for everything. And I had to prove myself to people that I knew were not better than me.

money flowing, she lived in the dorms, met new people, and developed her political views and a penchant for social justice activism. She experienced life—which is probably what she needed the most.

"For me, MSU was the place that showed me a world I would never have known," she says. "Being there allowed me to experience a different life and people, which helped me envision who I could become. It took me away from a protective family; away from Flint,

tips and transactions were the way to earn commission.

She didn't like talking on the phone and she was too shy to ask for referrals, but she didn't want to build a clientele that way, anyway. She wanted to look people in the eye. Listen to their concerns. Build a relationship with them, not just with their money. It was harder and slower to do it that way, but it felt right. She listened to her gut, assured her branch manager that it would work—and it did.

Dalal Salomon, B.S., '77

With those tactics, once disavowed for being “different” and not generating “numbers” quickly enough, Salomon became the first person in her branch of 50 advisers to hit \$1 million in revenue.

Today, she is among the top financial advisers—not just female financial advisers, though she’s made those lists, too—in the country. She is CEO and founding partner of Salomon & Ludwin, a firm that manages over \$1 billion in assets using the same genuine,

caring, relationship-based strategies that she struggled to gain traction with at the start of her career.

Salomon is a role model for anybody entering the financial advisory world—especially women, who to this day make up no more than 15-20% of the field. She has plenty of wisdom to share with the next generation, but her favorite piece of advice is from her own role model—her mother—who used to tell her: “Don’t listen to what other people say. Look in the mirror.

You know who you are.”

She does. She found a way to forge her own path and be successful, not in spite of her differences, but because of them. And to her mother’s refrain, she adds a few more practical pieces of advice: “Find your passion and what holds meaning for you. Then make a plan and work the plan.”

A Father's Pledge

Alumnus honors his son and works to change laws to help to make our roads safer. BY RUSS WHITE, '82, '01

Four and a half years ago, MSU student Mitchel Kiefer was tragically killed in an auto accident on I-96. The freshman was returning to campus after a weekend at home with his family, including his father, MSU alumnus Steve Kiefer.

In 2016 Mitchel's death was one of 735 fatalities on Michigan roads. It was the shock of learning his death was caused by a distracted driver that galvanized Steve and his entire family.

National surveys continue to show that a large majority of us understand that distracted driving, particularly texting while driving, is extraordinarily dangerous. But many of us don't take action.

Steve founded The Kiefer Foundation not only to honor his son's legacy but to begin the important work on 24 objectives to make our roads safer. He approaches planning for the foundation much like he does his work as an executive at General Motors—with vision, strategy and partnerships.

"Until something like this happens

to you personally, I don't think people really understand the magnitude of the problem," Kiefer says. "It's important for people to realize this is a global problem—1.25 million people are killed on the highways of the world every year.

"It's hard for me to imagine that today and tomorrow and the next day, every day, we're going to have another 10 people, another 10 families, going through what my family has gone through.

"It's a horrific thing to think that one small act of lack of paying attention, of distraction, can destroy lives forever."

Kiefer was appointed to the Governor's Traffic Safety Advisory Commission (GTSAC) by Michigan Governor Gretchen Whitmer in 2019. The purpose of the GTSAC is to provide leadership in the identification of state and local traffic safety issues and promote recommended strategies to address them.

"We're working now on hands-free legislation. If you're in a vehicle and

you're holding the phone for any reason, it becomes a primary offense," Kiefer says.

"We really believe that if the laws are in place and then the awareness and enforcement are in place, that we have a tool that law enforcement can use. Because right now, laws that ban texting still allow people to hold the phone in the car. And it's just impossible for law enforcement to determine what a person is doing on their phone to distinguish between texting and phone usage. We believe that the hands-free laws will give law enforcement a tool that will be able to change behavior. Every state that has implemented these laws has seen significant reductions in crashes and deaths as a result of these hands-free laws.

"There are now 25 states that have these hands-free laws in place. Unfortunately, we haven't been able to get the law passed here in Michigan. There's a bill that's being developed and sponsored in the House right now in Michigan. Our

Steven Kiefer, '86
College of Engineering

hope and expectations are to get as many people on board as possible to support this bill and to support the passing of a law. We have a goal to get the bill brought forward and through the state Legislature and passed into law by September of this year.”

As for the status on those 24 objectives—there are seven left to go.

Better Together

Coty Raven Morris uses music as a vehicle to get people talking naturally about diversity, equity and inclusion—and it's working! BY LIAM BOYLAN-PETT

In October 2019, Coty Raven Morris was asked to speak at the Texas Music Educators Association 2020 conference in February. She was a graduate student in the Michigan State University College of Music at the time, and she was being asked to present on diversity, equity and inclusion to music educators throughout the state.

Without a Ph.D. in the subject area, Morris questioned if she was qualified—she felt a sense of impostor syndrome. She had, however, taught choir for six years in Texas before enrolling at MSU in 2018, and had worked with youth music programs in Lansing in her time as a Spartan. So, at the urging of a mentor, she decided to present at the TMEA conference.

The resulting presentation laid the groundwork for Morris' Being Human Together, a "budding music education community striving to normalize difficult topics in [the field of music] through conversation and connection."

"We don't know how to communicate anymore," Morris says. "And I created Being Human Together because I know we can have conversations where we understand people, where we slow down and actually get to know human beings. We need to realize that it is important to practice conversation."

Being Human Together did not hit the ground running immediately,

however. After wowing the TMEA crowd with her talk in February, Morris had to figure out what was next. She was graduating in May with her Master of Music in choral conducting, but she also wanted to work on something like that DEI presentation. Then the pandemic halted the world and George Floyd was killed in Minneapolis. Morris knew it was time to bring her ideas to a larger crowd.

Fortunately, there was an audience. In June 2020, Morris, from her apartment in East Lansing, put on a series

“I know we can have conversations where we understand people, where we slow down and actually get to know human beings. We need to realize that it is important to practice conversation.”

of events over Zoom. Using a lot of the same materials she used in her presentation at the TMEA conference, Morris dubbed it Being Human Together. Over three sessions, she met with teachers, students and anyone else who would join.

Morris focused on discussions that avoided creating tension between people having conversations. Like the name of her program, she focused on getting better together. "People reached out to me, letting me know that I was inviting them to grow," Morris says. That growth is vital, according to Morris, and it's something she is proud to bring to Being Human Together.

Since those three sessions in June, Morris has presented in front of multiple classrooms and at clinics and workshops. She moved back to Texas, where she is the director of choirs at Crosby High School in the Houston area.

She is going to continue building Being Human Together—to keep discussing traditionally taboo subjects like mental health, systemic oppression, diversity and inclusivity. She credits her time at MSU for showing her that she could be a leader in that field. "My time at MSU showed me that I do love music," she says, "but it made me really flesh out my teaching philosophy: My life's purpose is to touch as many lives as possible through the vehicle of music."

With Being Human Together, Morris is on her way.

Coty Raven Morris, '20
College of Music

A talented musician, educator and communicator, Coty Raven Morris has performed, conducted award-winning choirs and orchestras, and inspired students and fellow educators. Through the vehicle of music she has shown them how to better communicate with each other, recognize their common humanity and grow together.

“ I always thought that Michigan State had a top-notch computer science department. It prepared me for the idea that you have to work in teams if you want to get big jobs done. That’s all there is to it.

Rocket Man

In a career that’s been literally out of this world, Terry Himes has helped NASA get to Mars—a few times.

BY LIAM BOYLAN-PETT

At 14, Terry Himes already knew where he wanted to work. Based on his hobbies, it was an easy decision. Whether examining pictures of galaxies and space or shooting rockets up in the sky in Grand Ledge, Michigan, in the 1960s and ’70s, Himes had his eyes set on exploring space.

“I was kind of gearing my whole education around working for NASA,” Himes says.

He stuck to it. Today, Himes is a spacecraft and software engineer for NASA’s Jet Propulsion Laboratory. He helps NASA communicate with its robotic spacefaring explorers—which means he played one of the many pivotal roles when NASA’s Perseverance rover landed on Mars on February 18.

The mission, dubbed Mars 2020, was not Himes’ first. The InSight lander touched down on Mars in 2018, and the rover Curiosity has clocked more than 3,000 Martian days on the fourth rock from the sun. Himes builds relay commands for all

three missions. The Mars 2020 mission became the first to send footage of the landing back to Earth—captivating the globe as it touched down in real time.

Himes was captivated too, and he was right in the thick of it—exactly where he wanted to be. After high school, he attended MSU to pursue a degree in computer science. NASA remained front and center. “I always thought that Michigan State had a top-notch computer science department,” he says. “It prepared me for the idea that you have to work in teams if you want to get big jobs done. That’s all there is to it.”

When he graduated in 1975 from the College of Engineering, however, the Jet Propulsion Lab was not hiring. He was working at his own company in 1990 when a former colleague reached out: NASA needed help with a spacecraft they were building. So, Himes began working as a consultant on the Mars Observer. He was hired by the Jet Propulsion Lab in 2001 and has been on staff ever since.

Himes remains hard at work. Perseverance’s mission is far from over.

Terry Himes, '75
College of Engineering

Now on the red planet, the rover is collecting Martian rock and soil samples. Himes is on the team that is working to bring those samples—which may contain evidence that life once existed on the planet—back to Earth. The Mars Sample Return Mission is a collaboration between NASA and the European Space Agency that aims to bring pieces of Mars back in the early 2030s.

In the meantime, Himes continues to keep an eye on NASA rovers, landers and orbiters that explore the solar system. Keeping tabs on machines millions of miles away is a busy job. Himes, however, has been ready for decades.

ABOVE: In addition to being involved in landing and operating rovers such as Perseverance (above) on Mars, Himes is also experienced at retrieving extraterrestrial samples. He helped to gather specimens from both a comet and the Sun's solar wind as part of the Stardust and Genesis missions, in 1999 and 2001, respectively. Stardust was the very first sample mission of its kind.

Embracing the Creative Arts

How Spartans have used creativity to provide inspiration and encouragement to benefit the lives of others.

Humanity maintains a longstanding relationship with art—specifically, art conceived from struggle and pain.

When faced with turmoil, some of history's most celebrated creators—Beethoven, Kahlo and Hemingway among them—embraced the creative arts to gain perspective, peace and relief. And in a nod to art's transformative power, such imaginative outpourings have prompted inspiration, introspection or, in the greatest of examples, thoughtful change among audiences.

Today, Spartans carry on this tradition of using the creative process to fuel themselves and others.

A young poet, staring down her own mortality, examines gender and faith, igniting empathy and compassion for those battling illness.

A screenwriter, informed by horrid courtroom cases of abuse, compels us to understand the plight of foster children.

A podcaster, recognizing the anxiety-ridden perils of the COVID-19 pandemic, pushes us to believe in ourselves and cultivate growth.

For these Spartans, the creative process spurred personal progress, but also served as an invitation to nurture the human spirit.

BY DANIEL P. SMITH

LEILA CHATTI, '11

POETRY AS PRESCRIPTION. LEILA CHATTI USES POETRY TO NAVIGATE ILLNESS, MORTALITY AND SHAME.

Leila Chatti does not hesitate to call 2015 the worst year of her life. Facing a rare illness that brought incessant pain and menstrual bleeding, Chatti felt ostracized and punished, angry and abandoned.

Poetry provided a necessary escape. As she penned verse about dealing with taboos around womanhood, spirituality and illness, Chatti gained context and calm. The creative flurry sparked perspective and purpose, as well as “Deluge,” Chatti’s critically acclaimed debut book.

“Poetry allowed me to be in charge,” Chatti said. “Writing helped me diffuse the immediate pressure I was feeling so I could move forward.”

A POET’S ROOTS

Chatti grew up in East Lansing, the daughter of a Catholic mother from metro Detroit and a Tunisian-born Muslim father, Karim Chatti, a civil engineering professor at MSU. As a child, she embraced her faith and writing, finding an inspiring blend of both in Koranic recitations.

“I saw that musical language could be important and sacred,” Chatti said.

Though displaying an early aptitude for writing—she won elementary school writing contests and gained publication in high school and college literary journals—Chatti considered poetry a hobby, not a legitimate professional pursuit. She envisioned a career teaching English abroad, activating the first steps toward that plan by joining Teach

for America upon graduating from MSU in 2011.

“As the oldest child, I felt pressure to get on with life and a career,” she said.

As Chatti immersed herself in a special education classroom in Oakland, California, she tabled her writing pursuits, a seemingly rational, adult decision. In silencing her muse, however, Chatti increasingly felt empty and incomplete. She joined a Bay Area writing group, and as she penned verse about navigating the world as a young adult, exploring concepts such as identity and place, spirituality and relationships, her energy climbed.

“I write because I have questions and I’m trying to understand something I have experienced,” she said. “My impulse is always to examine and understand.”

Yet Chatti began to discover more career possibilities in writing. She applied for MFA programs and embraced the energizing possibilities materializing before her.

“I couldn’t have been more excited,” she said.

A TURNING POINT

Then, the bleeding started. The pain followed. When doctors discovered a massive tumor on Chatti’s uterus, they feared it was a potentially untreatable, aggressive cancer that might end her life within two years.

As Chatti, then 22, began her tour of doctors’ offices, the pain and bleeding, often sudden and overwhelming, persisted. She felt physically weak and embarrassed. She thought God had cursed her.

Leila Chatti, '11
Residential College in the Arts and Humanities
Honors College

THE COVER OF 'DELUGE,' PUBLISHED 2020

"I had a lot of shame and there were dark times," Chatti said.

Poetry offered solace, a break from the weighty emotions consuming her mind and soul. Whenever she felt frozen in trauma or fear, she responded with raw, reactionary verse. Poetry served as a prescription for the pain.

"It was satisfying emotionally to put something down, but also satisfying intellectually to wrangle a heavy feeling into language," she said.

Chatti feverishly submitted her poetry to journals and contests. Though afraid that writing about her illness—and menstruation, specifically—would be limiting and too graphic, she instead found awards, grants and publication. One poem, "Confession," earned Chatti the Emerging Writer's Prize from Ploughshares, one of the nation's premier literary journals.

CREATIVITY AS CURE

Chatti's prolific work spurred "Deluge," her 52-poem book that begins with "Confession" and twists through faith, womanhood and illness. Each poem, up until the last, proved therapeutic.

"When I reached the final word and hit the period, knowing I was done, it felt like something had left me and pushed me away," Chatti said. "I had gotten used to this high-intensity stress, but then the clarity was also intense."

Since its 2020 release, "Deluge" has earned widespread praise for its candid storytelling and vivid language. The New York Times called the collection "a bracing accomplishment," while Publishers Weekly labeled it an

"unflinching debut" that "translates a gritty, traumatizing experience into a hypnotic, transcendental topography of the human spirit."

"I'm grateful for the reception 'Deluge' has received, but I also know that chapter is safe and done for me," Chatti said. "I couldn't write that book again if I tried."

Indeed, Chatti inhabits a different space now. Healthier—the tumor on her uterus was benign and was removed in March 2015—Chatti celebrated her 30th birthday last year and is now pursuing her Ph.D. in creative writing at

“It was satisfying emotionally to put something down, but also satisfying intellectually to wrangle a heavy feeling into language.”

the University of Cincinnati while also serving as the Mendota Lecturer in Poetry at the University of Wisconsin. Her muse remains active, propelling her work on two full-length books as well as chapbooks.

"For me, writing is like putting my feelings in a jar so I don't have to hold the memories anymore," Chatti said. "The feelings aren't gone, but they are not weighing me down, either, and that is a real gift."

JAY PAUL DERATANY, '84

AMPLIFYING VOICES. THROUGH HIS SCREENPLAY FOR "FOSTER BOY," JAY PAUL DERATANY HIGHLIGHTS UNNERVING REALITIES IN U.S. FOSTER CARE.

“With a legal case, I’m speaking to a jury, but that’s only 12 people. With the film, I had an opportunity to take my message to the next level, to speak to a larger audience and encourage broader social change.

Jay Paul Deratany simply will not look the other way.

Exposed to corruption in the nation’s foster care system as an attorney working on a case, Deratany continues tackling the horrors of a broken system on two fronts. As an experienced trial attorney, Deratany advocates for the protection of foster children against neglect and abuse in the U.S. legal system. As a screenwriter, Deratany amplifies that message. His screenplay for the award-winning 2019 film “Foster Boy,” a tale ignited by Deratany’s real-world legal career and starring Matthew Modine and Louis Gossett Jr., leverages the reach of the silver screen to illuminate negligence in the foster care system.

The Spartan connected with Deratany, a native of Warren, Michigan, to discuss his enduring commitment to reform the foster care system and the role creative pursuits play in this effort.

A political science major at MSU, Deratany savored his creative writing and theater classes as an undergraduate yet struggled to see the arts as a viable professional option. “Like so many around me in the 1980s, I went the practical route and enrolled in law school.”

In 1992, Deratany started his own law firm in Chicago and quickly gained recognition as a top trial attorney. Around 2000, a fellow attorney sent Deratany

a case about three children injured in the foster care system. The case opened Deratany’s eyes to private foster care, something he knew nothing about. “The idea that a huge corporation could be involved in foster care, treating kids as a commodity, was offensive and appalling to me.”

After that initial case, one that resulted in a \$23 million settlement, Deratany took on additional cases of foster care neglect and abuse, battling both state agencies and for-profit corporations. “I took one after another because I knew it was important work that made a difference.”

One such case involved a boy in Pennsylvania who was raped repeatedly by an older child in his foster home. Despite the older child’s history of being sexually aggressive with other children, the for-profit agency placed the younger child in the home anyway. “No corporation or state has the right to take custody of a child and knowingly place that child in danger,” Deratany said. Children have a constitutional right to live their life without injury.”

While Deratany pursued his MFA at the University of California, Riverside, a degree he would earn in 2013, a professor encouraged Deratany to “write what you know.” Deratany took the advice and began crafting an amalgamated story about different child abuse cases he had encountered as an attorney. “My

Alumnus Jay Deratany (center) with
"Foster Boy" cast members Matthew
Modine, Kystian Alexander Lyttle
and Shane Paul McGhie.

Jay Paul Deratany, '84
College of Social Science

professor saw my heart was into it, and that stoked my passion.”

That professor showed Deratany’s story to a film producer, which launched a fortuitous chain of events that included Deratany developing a screenplay and basketball legend Shaquille O’Neal signing on to be the film’s executive producer. “With a legal case, I’m speaking to a jury, but that’s only 12 people. With the film, I had an opportunity to take my message to the next level, to speak to a larger audience and encourage broader social change.”

the foster care system’s disconcerting realities. “It breaks your heart to see children being abused and the government agencies and for-profit corporations not being forthright about the level of abuse or neglect happening in foster care.”

O’Neal, Deratany and others are currently developing a television series to build upon the film’s success and its message. Poised to appear on a major cable network, the series will share realities of the foster care system through based-on-true-story accounts.

Deratany’s hope is systemic change, and he believes in art’s

“ We need to correct an imbalanced system and protect kids. ... We might be a divided country, but we all have to appreciate our children and lift them up.

Deratany took that challenge to heart, pouring himself into the writing life. He reached into the raw emotions of past foster care cases and transformed hurt and pain, shock and ire into compelling scenes, characters and dialogue. The writing process intensified his mission and sharpened his resolve, and Deratany embraced the opportunity to give voice to children caught in a defective system. “Confronting content like that, you get to hard moments, but you also discover truth.”

With the film’s awards and star power, “Foster Boy” disclosed the unseemliness of a fractured, though largely hidden, system and provided Deratany, himself a foster father, a bigger platform to speak about

power to spark awareness and action. While some of the nation’s nearly 500,000 children in foster care live in safe, supportive environments, far too many encounter gross negligence that sparks negative outcomes. Forty percent of foster kids who age out of the system, Deratany said, end up dead, homeless or in prison within three years. “We need to correct an imbalanced system and protect kids. That includes nationalized standards, no privatization and many more foster parents. We might be a divided country, but we all have to appreciate our children and lift them up.”

SUZANNE SENA, '85

CHAMPIONING CONFIDENCE. ACCUSTOMED TO BEING IN FRONT OF THE CAMERA, SUZANNE SENA GETS BEHIND THE MIC TO INSPIRE SELF-BELIEF.

“**C**onfidence.” Even the way Suzanne Sena says the word—clearly enunciating each syllable—feels poised, determined and assured, as if self-belief alone unlocks the door to a fulfilling life, which, it so happens, Sena believes it does.

“Confidence is everything,” Sena said. “It’s powerful and contagious.”

And something, she noted, that the contemporary world needs now more than ever.

When the novel coronavirus infiltrated American society early last year, so much of life’s familiarities evaporated. Schools and offices closed. Typical face-to-face interactions turned virtual. Celebrations, from graduations to weddings, morphed.

The pandemic compelled doubt and anxiety. It spurred loneliness and instability. It left schedules consumed by social events, business functions and family gatherings blank. It challenged perspectives and futures. Sena, a polished broadcasting pro, felt it, too.

“It’s like the rug was pulled out from under all of us,” she said.

Prompted by that reality, Sena, an Emmy-nominated television host and former national news anchor, devoted much of her time during the pandemic to resurrecting, instilling and cultivating self-belief. Her podcast, “The Confidence Connection,” connects listeners

to confidence-building strategies and motivational tales designed to stir souls and stimulate action amid unsettled times.

“If you believe in yourself, it leads you to try new things and feel you can do anything,” said Sena, currently working on a book to complement her podcast. “That’s an important message to share amid such uncertainty.”

GATHERING CONFIDENCE

Sena herself wasn’t always oozing confidence.

A metro Detroit native, Sena jokes that she initially attended MSU to spite her older brother, a University of Michigan alum. Though enrolling at MSU would become one of her life’s “most brilliant moves,” she nevertheless struggled to find her way as an undergraduate communications major contemplating a career in advertising or public relations. In fact, she only stumbled into broadcasting after a local news manager saw her playing a news anchor in a regional Chevy ad.

“That’s where I learned that a big part of being successful on camera was projecting confidence,” she said.

Willing to push her boundaries and convinced she had the tools to develop fresh skills, Sena tackled new professional opportunities. She inhabited the national desk at Fox News, covered Hollywood for E! and played a snarky

Suzanne Sena, '85
College of Communication
Arts and Sciences

confidence!

SUZANNE SENA

television anchor on The Onion News Network television show.

“People told me to pick a direction, but I didn’t want to limit myself,” Sena said.

When the pandemic hit in March 2020, Sena, like many, struggled to accurately comprehend the virus’ unrelenting grip on society, the challenges and changes it would force. As the weeks unfolded and the future clouded, however, the Los Angeles-based Sena identified confidence and adaptability as counterpunches to the troubling times. She tossed herself into the creative process for a podcast that would activate those ever-important jabs. She researched guests, crafted interview questions, assembled the podcast’s format and discovered the show’s opening music, an upbeat tune aptly titled “Win the Day.”

“I was knee deep in all of it,” said Sena, who soon found optimism and energy overtaking heavy feelings caused by the pandemic.

INSPIRING OTHERS

In May, Sena launched “The Confidence Connection,” committed to helping people see pathways to overcoming adversity and improving their lives. The podcast features interviews with extraordinary achievers—authors, entrepreneurs and entertainers among them.

“I like to help people get unstuck, so they can move on to be the people they want to be,” she said. “How important is that in today’s world?”

One guest, the rarely interviewed David Stapf, detailed his journey from unemployed teacher to the head of CBS Television Studios, an unexpected adventure fueled by honesty, humility and hard work. Another, Scarlett Lewis, discussed creating the Jesse Lewis Choose Love Movement, a nonprofit celebrating the life of her six-year-old son, who was killed in 2012’s Sandy Hook school shooting in Newtown, Connecticut. While navigating her own grief, Lewis designed an organization that helps youth become positive thinkers embracing courage, forgiveness, gratitude and compassion.

“In David’s case, he had the confidence that he could learn what he didn’t already know as he climbed the ladder to success, while Scarlett’s confidence that the world could be a better place has driven her to inspire the same in others,” Sena said.

Listeners responded in earnest, writing Sena notes and leaving online comments that used words like safe, reassuring and inspiring to describe “The Confidence Connection.”

“That confirmed this was needed,” said Sena, reminding us that confidence is not some intrinsic gift bestowed on a select few, but rather something anyone with a commitment to growth and adaptability can develop. “When you gather confidence, you’re prepared for opportunities before they arrive and also have the strength to confront whatever comes your way.”

A close-up portrait of Eli Broad, an older man with white hair and glasses, smiling. He is wearing a dark suit, a white shirt, and a blue tie. The background is dark and out of focus.

ELI BROAD: 1933-2021

Eli Broad Changed MSU Forever

*Unreasonable and
Unforgettable:
The enduring legacy
of Eli Broad at MSU*

“ I am deeply saddened by the passing of MSU alumnus, humanitarian and philanthropist Eli Broad, and my heart is with Edythe and the entire Broad family. Eli was a selfless, kind-hearted man who dedicated much of his life to making the lives of others better. From the classroom to the boardroom, altruism was the backbone of his mission, and Eli embodied what it means to be a Spartan.

MSU President, Samuel L. Stanley Jr., M.D.

Renowned entrepreneur, philanthropist, MSU alumnus and Detroit native, Eli Broad created an indelible legacy at his alma matter, envisioning and funding projects that have helped to create a better society and will benefit Spartans for generations.

Famously, he once told a class in the Eli Broad Graduate School of Management, “I love to build things.” He built many remarkable things including: a contemporary art museum in the Midwest, a public college of Business with a passion for innovation, a platform for partnering with public schools and a philanthropic legacy that has inspired many—and that’s just at MSU.

Our entire community is proud to pay tribute to this Spartan who inspired so many of us. We will dearly miss his relentless pursuit of excellence and forward-thinking wisdom.

Eli and Edythe often proudly pointed to their Detroit Public School educational roots. They married in 1954, the

year Eli graduated cum laude from MSU. He went on to build two Fortune 500 companies: KB Home and SunAmerica.

Named one of the world's most influential people by Time Magazine in 2016, Eli's successful business career enabled a devotion to philanthropy across the areas of education reform, scientific and medical research, and the arts. Co-founders of The Eli and Edythe Broad Foundation, their \$20 million gift in 1991 to the Eli Broad College of Business and the Eli Broad Graduate School of Management—both renamed in his honor—was the largest gift ever received by a public business school at that time and underscores the growing success of the college today.

In 2003, the Broads helped develop a new generation of urban schoolteachers with another multimillion-dollar gift, this time to the College of

Education, which established the Broad Partnership between MSU and Detroit Public Schools.

The Broads' commitment to build a world-class art museum led to the Zaha Hadid-designed facility on MSU's campus, which opened in 2012. Ten years later, the Eli and Edythe Broad Art Museum at MSU continues to garner international attention while adding mightily to the arts at MSU and throughout the region.

Like other things, Eli saw philanthropy differently too. In 2014, the Broads helped to jump-start MSU's *Empower Extraordinary* Campaign with a \$25 million challenge gift to inspire others to join them in making a difference.

Collectively, the Broads and their related foundation have given nearly \$100 million to Michigan State, making them the largest donors in MSU's history.

HIGHLIGHTS OF ELI BROAD'S INVOLVEMENT AT MSU:

1. Edward Minskoff joined Eli and Edythe Broad at the grand opening of The Eli and Edythe Broad Art Museum at Michigan State University in 2012.
2. Sanjay Gupta, dean of the Eli Broad College of Business, and Eli Broad meet up at an *Empower Extraordinary* campaign event in 2017.
3. MSU alumni Eli Broad (left), Edward Minskoff (right) and President Samuel L. Stanley Jr., M.D (center) during the opening celebration of the Minskoff Pavilion in 2019.
4. Eli Broad outside of the Eli and Edythe Broad Art Museum.
5. Members of the Eli Broad Graduate School of Management discuss keys to success in life and business with Eli Broad during a Skype call.
6. The (pictured) Broad Scholars were graduates of Detroit Public Schools who received full scholarships while completing the MSU Teacher Program, in exchange for committing to return to teach in Detroit.
7. Eli and Edythe Broad were joined by Michigan Senator Debbie Stabenow as they cut the ribbon on the new, Zaha Hadid-designed, Eli and Edythe Broad Art Museum.

By Bridgette M. Redman, '91

BELONGING: MUSIC TO OUR EARS

Jordyn Davis, '19, knows what it feels like to be isolated and knows how detrimental it can be to a sense of belonging.

The co-founder of Color Me Music, an organization designed to support Black, Indigenous and people of color, often referred to as BIPOC, in the MSU College of Music, was the first African American woman to receive a degree in music composition from the college. She was also the only Black student in her environmental engineering classes, which is where she started studying at MSU in 2013.

"My experience as an undergraduate in multiple colleges and as a graduate student had the feeling of not having a sense of community with other students of color," Davis said. "It was very difficult to make friends as the token Black student."

When in 2018, Professor Rodney Whitaker connected her and Jadrian Tarver, a fellow graduate student studying vocal performance, they were determined to create a space where BIPOC felt they belonged.

"Professor Whitaker was like, you guys need to talk," Davis said. "We talked and we are a match made in

heaven. We make a great team."

Color Me Music was born and since then has grown in scope and influence, especially over the past year, when the college came to them in response to widespread Black Lives Matter protests and the desire to recognize and rectify systemic racism in their midst.

“We put together a list of about 10 to 13 action items for the College of Music.”

Davis and Tarver assembled a group of people of color in the music department and made plans to encourage a sense of belonging. The group has curated concerts, held recitals, hosted social events, and attended lots and lots of meetings.

This past summer, with the senseless killing of George Floyd and Breonna Taylor, and in the midst of

the Black Lives Matter marches, the college approached Color Me Music to better understand how to make the community inclusive and more supportive of students.

On Zoom calls each week with College of Music Dean James Forger and a rotating panel of professors, they shared their experiences as students of color and how the curriculum really was not geared toward non-white people.

"They gave us the opportunity and the platform to meet with different heads of departments—musicology, music education, the marching band—we met with everybody and discussed the things they felt their communities were missing," Davis said. "As a result of that, we put together a list of about 10 to 13 action items for the College of Music."

One thing both pointed out to professors was that Western Classical music dominated the classrooms, ignoring the plethora of 20th-century music being made by non-white people.

Thanks to the efforts of Color Me Music, that is changing.

The meetings focused on diversity, equity, inclusion and belonging issues have translated into real change in the College of Music.

“The music theory and musicology departments have changed their curriculum,” Tarver said. “This year they are introducing African American composers to the repertoire and to the canon, not just white European composers such as Bach and Beethoven.”

Each year has featured a Black History Month recital. In 2021, they

had to go digital, but designated the theme as humanizing the Black experience. They have turned to people of color and asked them to share videos and performances that include a variety of experiences—the good, the bad, the ugly and the joyful, Davis said.

The concert is a mix of new and old recordings. It opens with the recent winner of the Social Justice Arts Festival at MSU.

“We’re starting the concert off with music called ‘Delight,’” Tarver said. “One of our members, Sequoia Snyder, shows the side of Black

resilience from the emotions of happiness and smiling and joy, emotions often never depicted when showing social justice.”

Color Me Music, which now has 30 to 35 members, will continue under the leadership of Jeremiah Flack and Phoenix Miranda when Davis and Tarver graduate this spring.

Davis expects the group will continue to do what has made them effective change agents.

ART FOR ALL

A torch of rusted bronze that climbs from the ground outside Fairchild Theatre. An abstract collection of crumpled steel that leads the way to Beal Garden. Bright red flanks of steel dancing in the wind at the entrance to Biomedical and Physical Sciences. There are hundreds of amazing public art pieces on MSU's sprawling campus. Over the next several pages, take a closer look at a handful of the human-made pieces that bring out the beauty on an already special campus.

ARAN KESSLER

The sun shines on the stainless-steel structure, golds and silvers sparkling and fluttering. Almost as if it is aflame, “Victoria” illuminates the Breslin Student Events Center day in and day out. Since being installed in 2017, the piece, which is lit by 96 bulbs at night and sits near the southwest corner of Breslin, has been a gateway to 1855 Place—a marker on campus. Or, as Steve Troost, campus planner and Public Art on Campus Committee member, says, “It gives a sense of ‘there’ on campus.”

Since 1999, when the MSU Public Art on Campus program was initiated by Board of Trustees action, a percentage of the construction cost of every new major facility or renovation project has been earmarked toward an art component. That decree has resulted in over 145 works of public art sprinkled across campus.

ON PAGE 46 (OPPOSITE):

TOP LEFT

Emerging from the landscape as a monumental gateway to the west end of MSU’s campus, “Victoria” celebrates the victory of academic achievement.

TOP RIGHT

A detail from “Wind Rapids II.” This sculpture does not sit on a pedestal; instead its welcoming gazebo-like structure encourages interaction between people and the artwork. It is intended to serve as a place of congregation for the building’s visitors.

LOWER LEFT

This is a tight close-up of the W.J. Beal Botanical Garden gates, created by East Coast artist Albert Paley. He has bent and interwoven metal to resemble vegetation.

LOWER RIGHT

The work invokes the artist’s gravitation to the freedoms embodied in abstract expressionism and the sculpture’s name is inspired by both the artist’s granddaughter Twyla and the professional dancer and choreographer Twyla Tharp.

TWYLA

FUNAMBULIST

At Snyder-Phillips Hall

Artist: John Van Alstine

Materials: Painted Steel

Not only does art give a sense of “there” on campus—think “Meet me at Sparty”—the art is meant to create discussion. Per the program’s authorization by the board, “The creative work of sculptors, painters and graphic artists enriches a learning environment, stimulates lively discussion and evokes aesthetic appreciation.”

That tenet remains important. From massive sculptures to abstract paintings, East Lansing is filled with stunning works of art meant to spark conversation. Walking around campus, students and visitors alike face pieces meant to provoke thought.

“Universities encourage growth,” Troost says, “and public art can impact any and everyone who walks through campus.”

LEFT
“Wind Rapids II” was designed in part to be a “bright arrow” pointing to the recessed entry of the building complex that is otherwise invisible to passersby.

TOP RIGHT
An up-close detail from the “Echo” sculpture showing the fabricated aluminum craftsmanship.

LOWER RIGHT
“Echo,” a repetition of sound produced by the reflection of sound waves from a surface, is the impetus for this work of art. The work is inspired by the invisible sound waves that emulate from the nearby amphitheater and reverberate onward in space.

“Public art is one of those amenities that enhances a community culturally and in turn helps attract a vibrant and diverse population.”

- Tom Berding, Dept. of Art, Art History and Design

TOP LEFT

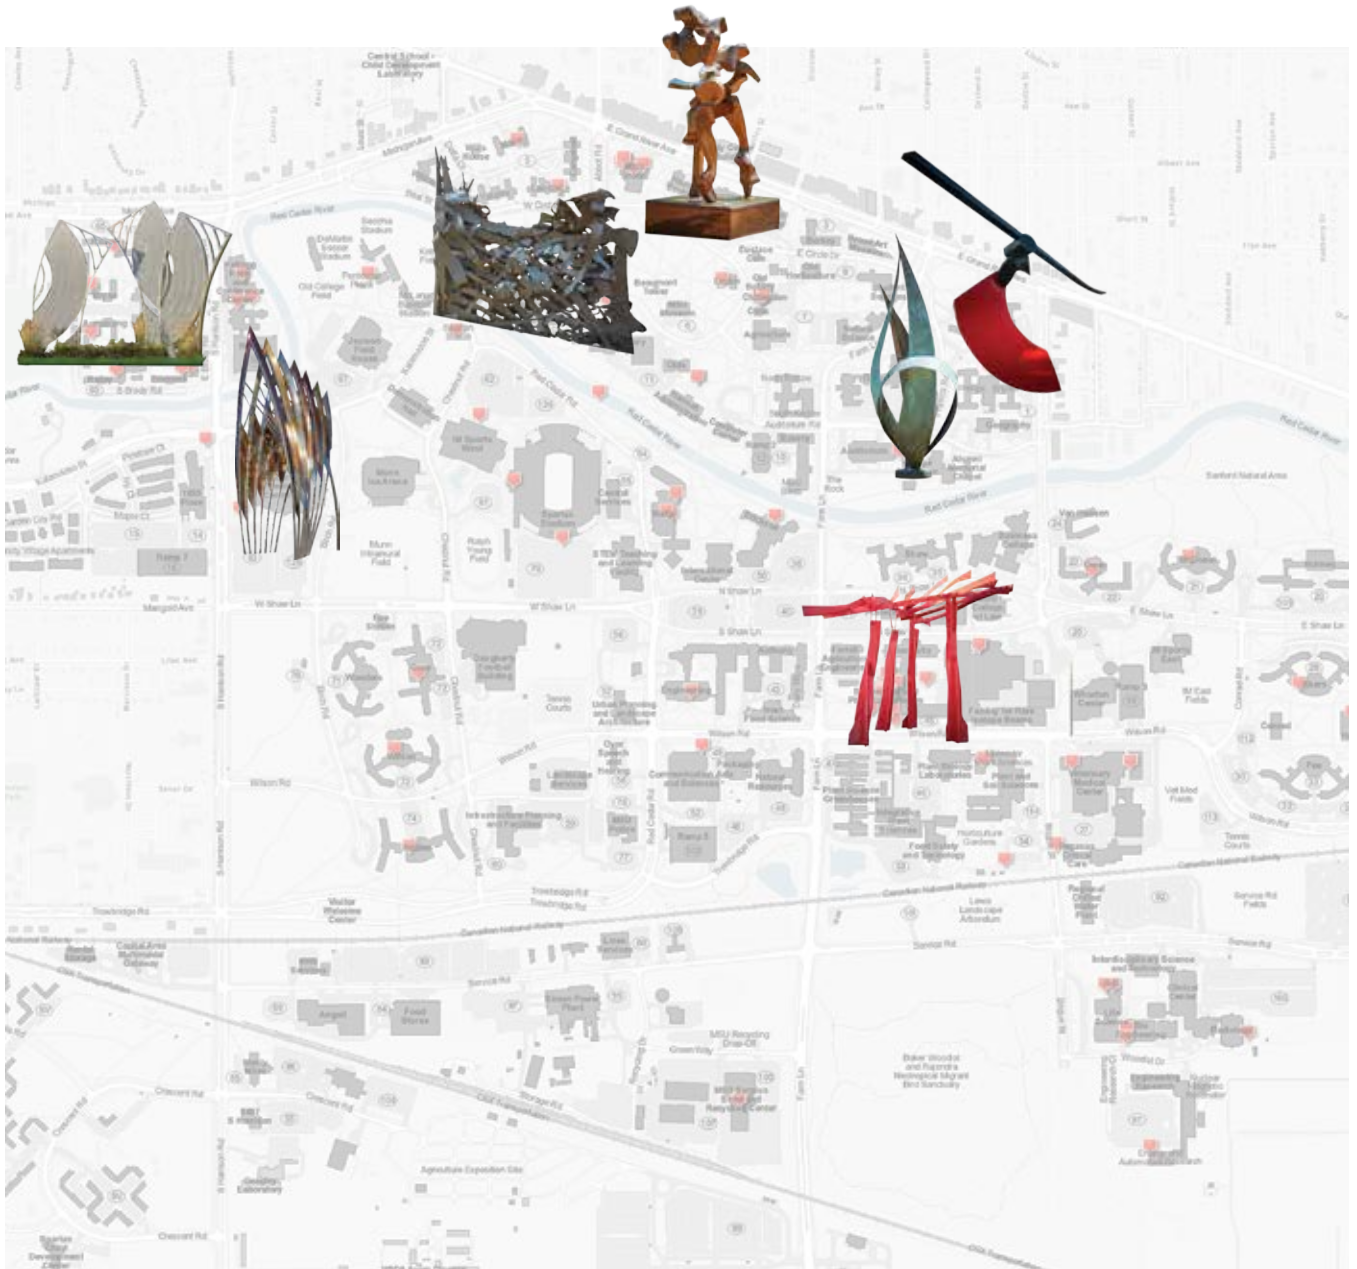

The sculpture "Emergence" is installed in front of the Fairchild Theatre on the MSU campus. It is 12 feet tall, and the bronze is taking on a beautiful green patina with age and weathering.

TOP RIGHT

The name, "Funambulist," comes from the Latin "funambulus," meaning rope dancer or tight-rope walker. The sculpture aims to connect with the students who make Snyder-Phillips Hall their home. "Navigating through college requires students to perform a balancing act while remaining daring, bold and creative," says the artist.

LEFT

These imposing metal gates to the W.J. Beal Botanical Garden were created by artist Albert Paley. The design represents the natural interweaving of vegetation. Paley is the first metal sculptor to receive the coveted Institute Honors awarded by the American Institute of Architects, the AIA's highest award to a non-architect. The gates are one of currently only 50 or so site-specific works created by the artist.

Explore more art

Works of public art can be found in nearly all corners of MSU's East Lansing campus.

There is more to public art at MSU than the structures featured in this piece. Head into a building on campus, and it is likely you will find a piece of art on a wall or a smaller sculpture in a hallway. With hundreds of works, there is plenty to see.

The seven works featured in this piece are shown on the above map, and hundreds of other pieces are also scattered across MSU's 5,300 acres. For images, information and locations of all pieces, check MSU's Public Art on Campus site.

Spartans Connect and Inspire

AMBITIOUS PROGRAM LEAVES A LEGACY OF ART AND CRAFT AT MSU

Nine buildings or structures and seven art projects at MSU are part of the Works Progress Administration legacy.

Among the most charming and perfectly placed pieces is this glazed terracotta sculpture, titled Children Reading.

The small yet vibrant glazed terracotta sculpture and fish head fountain spout, by Michigan artist Clivia Calder Morrison, are part of a garden wall that leads to Sarah Langdon Williams Hall. The three young girls reading serve as a symbol of education, which is fitting to this once all-female residence hall.

Hopeful for the Fall

We are excited to see you in person—safely—again soon.

As I look forward to the fall semester at MSU, I am filled with excitement. We have spent the past year hoping to see students and alumni back on campus and at athletic events. It seems we might be able to do just that this fall.

MSU plans to have students back in a larger capacity, and with that comes the belief that we will be able to see alumni in person, too. Safety will continue to be our top priority, and we are eager to make campus a place of community once more. Homecoming may look different than in past years, but we are excited about the potential to host more in-person events in a safe and celebratory way. Be sure to visit alumni.msu.edu for the latest information as we finalize plans for the fall.

I want to thank the alumni community for stepping up in these times of virtual events and gatherings. The way that Spartans around the globe have found to stay involved with MSU throughout the past year has been awe-inspiring.

Give Green Day was moved to the spring for the first time ever, and 7,039

Spartans around the world donated over \$1.24 million. Of those gifts, over 1,200 were from first-time donors. Even amidst a pandemic, you gave to programs and departments that mattered to you, many of which support emergency funds for students in need of aid.

Our alumni clubs made a big difference on Give Green Day, contributing 18% of the total money raised. Many people gave as part of the 1855 Donor Project, which encouraged

gifts of \$18.55, \$185.50 and \$1,855 in honor of MSU's founding year.

Alumni contributed in more ways than one. On the Global Day of Service, a thousand Spartans volunteered in their communities and virtually. From writing letters of support to MSU students in recovery, to mapping parts of the world to aid in humanitarian relief, to volunteering at numerous food banks, MSU's community impact was felt around the world.

Moving forward, as we transition to more in-person gatherings, we are still going to be reaching out to you virtually, as well. We have enjoyed being able to get large groups together and want to continue to find ways to stay connected.

No matter the venue, I look forward to what is ahead for the Spartan community.

Go Green!

News from Spartans Around the World

SPRING ON THE MICHIGAN STATE UNIVERSITY CAMPUS

1970s

DIANE CARPENTER EMLING, '72 (James Madison, Honors College), M.A. '74, Ph.D. '81 (Both in Social Science), is professor emeritus of sociology at Northwestern Michigan College and the recent author of "Institutional Racism and Restorative Justice: Oppression and Privilege in America." Emling's book explores more than 400 years of American systemic racism as invisible, intractable and deadly. It suggests restorative justice steps needed toward creating a more diverse, equitable and inclusive society for all.

DANIEL WOLF, '76, MBA '77 (Both in Business), has published his third book on strategic leadership and governance, "Strategic Teams and Development: The FieldBook for People Making Strategy Happen."

Wolf explores the dimensions of individual and collective talent that must come together in strategic teams. Wolf is the president of Dewar Sloan, a consulting group with expertise in strategy and governance.

1980s

LEV RAPHAEL, Ph.D. '86 (Arts and Letters), has published his 27th book "Department of Death: A Nick Hoffman Mystery." Raphael mentors authors through his initiative Write Without Borders and has been awarded a Picador Professorship by the University of Leipzig, Germany, where he will teach in their American Studies program starting next fall.

PETER FARICY, '88 (Business), has been named CEO of SunPower, a leading distributed generation

storage and solar energy services provider in North America. Faricy most recently served as CEO of Global Direct-to-Consumer for Discovery, Inc., overseeing businesses including Discovery+, Food Network Kitchen, Magnolia, Eurosport Player and GOLFTV.

1990s

KIMBERLY K. WILLIAMS, '92 (Engineering), was appointed the chief diversity officer for the health system at McLaren Health Care and assumed leadership for diversity and inclusion practices throughout the corporation. Additionally, she will continue to serve as vice president of talent acquisition and development.

JASON CARPENTER, '93 (Business), was recently named the managing broker and commercial director

for Keller Williams Grand Rapids East. Keller Williams GRE is the number one real estate office in West Michigan with \$649 million in real estate sales and leases in residential and commercial real estate for 2020.

TRUSTEE EMERITUS MITCHELL LYONS, '93 (Business), has published his first book, "Retirement of Steel." The former Michigan State University, NFL tight end, and trustee emeritus reflects on his playing days and how lessons learned from coaches and observing money management by NFL millionaires helped him carve out a successful career in wealth management.

MATTHEW FRAIBERG, '94 (Social Science), was voted to the Board of Directors of the Jewish Association for Residential Care (JARC). He will serve a two-year term. Fraiberg and his wife recently established the Fraiberg-Goodman scholarship to benefit MSU College of Law students beginning in 2021. Fraiberg is the senior partner of Fraiberg & Pernie, a criminal defense law firm in Birmingham, MI.

MICHELE WALTON, '96 (Social Science), has been promoted to senior vice president, general counsel for The Taubman Company. In her role, Walton is responsible for all legal affairs and functions and serves as a member of the company's operating committee. The Taubman Company is engaged in managing and leasing 26 regional, super-regional and outlet malls in the U.S. and Asia.

Class Notes cont'd

BRIAN DOUBLES, '97 (Engineering), has been named CEO of the consumer financial service company Synchrony. Doubles is currently president of Synchrony, the largest U.S. store credit-card issuer and a Fortune 200 company.

DAMON L. GARRETT, '97 (Engineering), was promoted to president at Metro Consulting Associates (MCA) in Plymouth, Michigan. A founding member of MCA, he has more than 20 years of civil engineering experience, executive leadership and project management.

JASON T. HANSELMAN, '97 (Social Science), has been appointed as managing member of Dykema's Lansing office. As a leading lawyer in his practice, Jason counsels clients through complex business matters in highly-regulated areas, including energy, elections, education and health care.

KIMBERLY L. UHURU, '97 (James Madison), was appointed by the Michigan Supreme Court to the position of deputy administrator of the Michigan Attorney Grievance Commission. Uhuru will help lead a team of 12 attorneys, as well as prosecute complex attorney discipline cases.

SALIM BHABHRAWALA, '98 (James Madison), was recently named the critical minerals sector lead at the United States Department of Commerce's International Trade Administration. Bhabhrawala has been assigned to the task force working on President Biden's Executive Order to secure domestic material supply chains, such as those for advanced batteries in electric vehicles.

MATTHEW CHYNOWETH, '98 (Engineering), the chief bridge engineer for the Michigan Department of Transportation (MDOT), has been named one of the American Segmental Bridge Institute's 2020 Leadership Award recipients for outstanding career contributions.

KATRINELL DAVIS, '99 (James Madison, Honors College), recently published "Tainted Tap: Flint's Journey from Crisis to Recovery." The book examines the crisis through the lenses of urban renewal, community organizing and hazard management politics in low-resource communities, offering a comprehensive account of how political, social and economic factors shape Flint's lived experiences. Davis is associate professor of sociology and African American Studies at Florida State University.

ERIC FEDERSPIEL, '99 (Arts and Letters), M.A. '05 (Education) and LUCAS RODESILER, '00 (Social Science), M.A. '07 (Arts and Letters), co-authored a chapter entitled "Revisiting Maus through Epitext: A Layered-Literacy Approach" in "From Text to Epitext: Expanding Students' Comprehension, Engagement, and Media Literacy." Federspiel and Rodesiler's chapter focuses on the use of comic books and graphic novels, specifically "Maus" and their value in secondary education.

2000s

MAT ISHBIA, '03 (Business) the CEO of United Wholesale Mortgage, took the company public in January 2021. The stock has traded between \$9.30 and \$14.38 since its market debut. UWM

works with independent brokers around the country to underwrite and service mortgages. It is one of a number of nonbank mortgage companies embracing the public markets at a booming time for the U.S. housing market.

H. SCOTT BUTTERFIELD, Ph.D. '06 (Natural Science), recently published "Rewilding Agricultural Landscapes: A California Study in Rebalancing the Needs of People and Nature." The book uses California's southern Central Valley as a case study for returning balance to agricultural lands and natural ecosystems. Butterfield is a senior scientist for The Nature Conservancy. He leads a research team made up of university, agency and NGO scientists, focused on addressing recovery goals for threatened and endangered species.

AARON HONSOWETZ, '08 (James Madison, Social Science), has co-created the strategic board game "Robotech: Reconstruction," set to be published by Strange Machine Games in late 2021. The game is based on the anime series "Robotech" and requires players to leverage allies and enemies on their way to victory. Honsowetz is an assistant professor of economics at Bethany College, West Virginia.

CHARLES A. BELL, M.A. '09 (Education), has an upcoming book, "SUSPENDED: Punishment, Violence, and the Failure of School Safety," to be published by John Hopkins Press in Fall 2021. The book focuses on students', parents' and educators' experiences navigating school punishment and multiple forms of violence in inner-city and

metropolitan Detroit schools. Bell is an assistant professor in the Criminal Justice Sciences department at Illinois State University.

2010s

TRACY BROWER, '11 (Social Science), recently published her second book, "The Secrets to Happiness at Work." The book aims to empower people to create and choose the conditions for happiness, wellbeing, fulfillment and success. Brower is a Ph.D. sociologist studying work-life fulfillment and happiness, and is a principal with Steelcase's Applied Research and Consulting group. Brower's work has been featured in TEDx, Inc. Magazine, Fortune, the Wall Street Journal and HBR France.

KRISTA M. STEVENS, MSW '11 (Social Science), has been named the executive branch director at Bethany Christian Services in East Lansing, Michigan. For over 75 years, Bethany Christian Services has worked to protect children, empower youth and strengthen families through quality social services.

KELECHI UCHENDU, '13 (Social Science), a fashion entrepreneur and author, recently had her fashion accessories brand Kay Kay's Fashion debut at Tuesday Morning, a national retailer headquartered in Dallas, Texas.

MSU Pavilion Becomes a Super Site

Sparty is on the job to help 1,000 people a day receive a dose of the COVID-19 vaccine.

The clinics at the pavilion require more than 100 volunteers each day, cooperation between emergency and health agencies and careful coordination by the Ingham County Health Department and MSU. The 77,000-square-foot pavilion and the MSU staff, who have volunteered more than 15,000 hours of service, have helped things run smoothly. Both the pavilion and the volunteers have been a source of inspiration during the pandemic.

Good things happen
when **we work together.**

We're proud to partner with the MSU Alumni Office. To learn more about Liberty Mutual auto and home insurance, please call us at 1-800-469-6720, or visit libertymutual.com/msuaa.
